Support Services

There are three levels of **Operating System** software support:

1) AMS = Account Management Support
(Materials + Telephone Support + Local Support)

2) RCS = Response Center Support
(Materials + Telephone Support)

3) SMS = Software Materials Subscription
(Manual Updates, Software Updates,
The Communicator, Software Status Bulletins)

The Data Communications and Office Software are divided into two categories:

Data Management - DSG/250
TEXT/250
SLIDE/250

Data Comm B - DSN/DS
DSN/RJE
NETWORK/250

Purchase of a Category Support extends Operating System coverage (either AMS
or RCS) to all of the software in that category. The media option (Tape
Cartridge or Flexible Disc) specified in the Operating System coverage product
will be assumed for software updates for the Category Software products.

For example, if a customer buys Data Management Support for DSG/250 they would
not have to buy it again if SLIDE/250 and/or TEXT/250 were added to the system.
However, the customer would purchase SMS for each piece of subsystem software.

Example: Customer wants software support on tape cartridge media for the Operating
System ("B" version), DSG/250, SLIDE/250, and NETWORK/250.

Customer purchases:

AMS	#45230B+H22
Data Management Support	#99083C+C00
Datacomm B Support	#99086C+C00
SMS for DSG/250	#45150A+S00
SMS for SLIDE/250	#45170A+S00
SMS for NETWORK/250	#45125A+S00
