

92062A Driver Software Numbering Catalog

(This manual reflects information that is compatible with
Software Revision Code 1826.)

HEWLETT-PACKARD COMPANY
11000 WOLFE ROAD, CUPERTINO, CALIFORNIA, 95014

Library Index Number
92062.310.92062-90001

PUBLICATION NOTICE

Information in this manual provides the part numbers and file names of RTE driver software. Changes in text to document software updates subsequent to the initial release are supplied in manual update notices and/or complete revisions to the manual. The history of any changes to this edition of the manual is given below under "Publication History." The last change itemized reflects the software currently documented in the manual.

Any changed pages supplied in an update package are identified by a change number adjacent to the page number. Changed information is specifically identified by a vertical line (revision bar) on the outer margin of the page.

For research and education purposes only.

This catalog provides cross-reference lists of the 92062A software modules and the media on which the software modules are distributed. The purpose of the lists is to define the software modules currently supported with the product and to indicate the part numbers of different media on which these modules reside.

You will find several uses for this catalog. For example, you can use it to:

- order replacement software on the media type you need.
- find the software residing on any media type.
- determine the names of files on the media's directory.

This catalog contains two lists: the first is collated by software module number; the second by file name. The column heading of the lists define:

MODULE FILE NAME The unique, 6-character file name of the software module. The file names are the names used in the file directory of any medium which contains more than one software module (for example, an RTE FMP disc directory or a mini-cartridge directory).

MODULE DESCRIPTOR A concise definition of the software module.

SOFTWARE MODULE NUMBER The part number of the software module; the paper tape part number of the software module.

PART NUMBERS The part numbers of the various media on which the software modules reside. Currently there are six possibilities:

Paper Tape The number of the software module is the number of the paper tape part.

Mini-Cartridge A collection of software parts stored as files on a minicartridge.

7900 Disc A collection of software modules stored as named files on a 7900 RTE master software disc.

7905/7906 Disc A collection of software modules stored as named files on a 7905/7906 RTE master software disc.

7920 Disc A collection of software modules stored as named files on an RTE 7920 master software disc.

Flexible Disc A collection of software modules stored as named files on a flexible disc.
