

# Introducing HP's new System 45C Desktop Computer

Up to 4 913 crisp, clear colors  
and 449K bytes of user memory  
team together in a totally inte-  
grated computing system that's  
powerful yet easy to use.

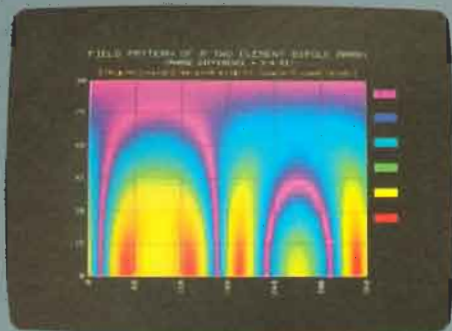

The System 45C brings eye-opening color and clarity to practically any application you choose. No matter what your application, a better understanding of the facts will help you make better decisions. With the new System 45C's powerful color graphics, you can simplify even the most complex data quickly and easily.

Whether you're an engineer, scientist or manager, color graphics can help you make more effective data presentations, increase productivity, and solve complex problems. You can use color for faster interpretation of mathematical relationships, warning signals, greater definition of detailed designs, added realism, or simply to attract attention to extra-important points. The viewer will enjoy fast, easy comprehension of displays that, with color, can be more informative and memorable.

**A Powerful Workhorse.** The System 45C is much more than just a flashy color display tool. Not only does this desktop computer provide you with an interactive color graphics CRT, but it also features a system ROM that gives you all the programming tools you need for powerful color graphics processing, plus a large user memory, high-speed I/O, dual-custom 16-bit processors, enhanced BASIC language, and built-in mass storage capability. All put together, the System 45C is an invaluable problem-solving tool. With it you can perform 3-D wire-frame designs of mechanical parts, integrated circuit design, thermal analysis, manufacturing process monitoring and control, production scheduling and much more.

# In every application,

**Functionally Integrated.** You get everything you need in one compact chassis that fits on your desk. With the flick of a single switch, all the elements begin working together to bring you quick solutions to your problems.

In addition to the powerful features already mentioned, the System 45C provides you with an interactive light pen, 80-column thermal line printer and typewriter-like keyboard. Everything's completely integrated into the system architecture. Yet with all its built-in performance, the System 45C remains friendly and easy to use.

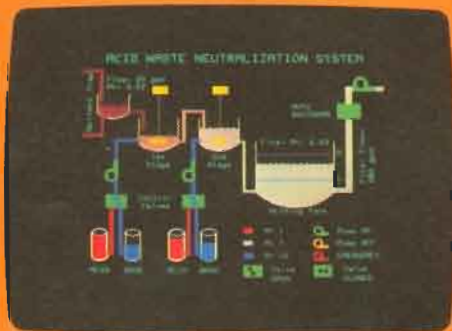

# color works harder.

To further enhance your desktop computer, you can choose from a wide range of Hewlett-Packard plug-in peripherals. You can tailor a system to suit your needs. Choose from plotters, printers, digitizer, cartridge and tape drives, cartridge discs, and more. All use a unified command structure that enables you to easily talk to a variety of devices.

To learn more about the new System 45C as quickly as possible, the fastest path leads through your local HP sales office and a talk with your desktop computer representative whose card is attached. Or, use the enclosed pre-addressed card and we will send you System 45C information by return mail.

For more information and a hands on demonstration, contact your HP sales representative today.
