

HEWLETT-PACKARD

Design Graphics Software for the HP DraftPro Plotter

The HP DraftPro is currently supported by the software packages listed below and more are being added every day. If you have an earlier release of one of these packages, it's likely you can use the HP DraftPro by selecting the HP 7580 entry on the "plotter configuration" menu in your software.

Information about these software packages can be obtained from the computer dealers or directly from the software suppliers. The phone numbers and addresses of the suppliers

are listed on the reverse side. These software products have not been qualified or tested by Hewlett-Packard.

This information is current as of the date of publication and has been compiled from the data supplied by the software vendors listed. It does not constitute an endorsement by Hewlett-Packard of any third-party software. Contact the software vendor or dealer directly to verify support information.
