

Spring/Summer 1992

HP APOLLO DIRECT

WORKSTATION CATALOG

Introducing the Model 710, the industry's best price/performance desktop color workstation – see page 5.

For ordering and pre-sales technical assistance call 800-637-7740 ask for operator W221.

Dear HP Apollo Workstation User,

When you're ready to add capabilities to your workstations, I encourage you to call HP Apollo DIRECT — the instantly accessible partner to your local HP field sales representative.

This service is another way of demonstrating our commitment to your continued satisfaction with HP Apollo Workstation products.

At HP Apollo DIRECT you can talk directly with technical support engineers to help clarify configuration or other pre-order questions about the HP-UX and Domain Workstation products in this catalog. At the same time, HP Apollo DIRECT customer representatives are on hand to quickly enter your order right over the phone — at the same contract discount terms offered by your local HP sales office. Be sure to tell your purchasing department!

Thank you for choosing Hewlett-Packard.

Sincerely,

Gary B. Eichhorn
General Manager
Workstation Business Unit

**LOOK FOR THESE HELPFUL
SYMBOLS THROUGHOUT
THE CATALOG.**

PRODUCT LITERATURE

Detailed literature is available for these products.

Just call 800-637-7740 and we'll send you the information right away.

OFF-THE-SHELF DELIVERY

These products are ready when you are. They're on the shelf, ready to ship. In most cases, your product will be shipped the next day.

NEW PRODUCTS

These HP products have been introduced since the last HP Apollo DIRECT catalog was published.

HP Apollo DIRECT gives you three ways to order.

**1. Call our toll free
number... 800-637-7740**
ask for operator W221
Monday through Friday,
6 a.m. to 5 p.m. Pacific Time

2. FAX your order...
408-345-8398

3. Mail your order to...
Hewlett-Packard Co.
DMO
Bldg. 51L-SC
P.O. Box 58059
Santa Clara, CA 95051-8059

*Whether you call, FAX or
mail your order, it will be
handled with the same
efficiency and care.*

*Technical engineers are avail-
able to help you select the right
products before you buy.*

SATISFACTION GUARANTEED

Hewlett-Packard is committed to giving
you the highest quality products. If you
are not satisfied for any reason, simply
return your purchase in it's original
condition within 60 days for a full
refund or credit. Call us at 800-637-7740
for return instructions.

Note: Please see page 95 for a complete
return, and warranty policy.

The most popular HP-UX and Domain
documentation for your HP Apollo
Workstation equipment.

HP-UX Family

Hewlett-Packard offers the largest range of compatible UNIX Systems in the world

HP offers the broadest family of compatible UNIX workstations, servers, and multiuser systems in the industry. So when you need to add applications and users, you have plenty of room to grow.

The HP 9000 family has a solid foundation in the standards that protect your

investment in hardware, software, and training. Our tightly integrated HP-UX operating system optimizes performance and enhances reliability and ease-of-use within a base of industry standards.

This catalog features Hewlett-Packard's Series 300, 400 & 700 workstation products offering users an easy way to add or upgrade their current system or network.

HP also offers PA-RISC architecture Series 800 Business Servers designed to cost-effectively deliver premium performance for commercial applications. To receive HP's Business Computer Systems Catalog, please check the Business Systems and Servers catalog box on the business reply card attached to this catalog.

Performance Leadership, Investment Protection

Hewlett-Packard offers a full array of RISC- and Motorola-based workstations and servers that lead the industry in price and performance, along with RISC-based X stations for the lowest cost-per-seat and excellent X Windowing.

When you invest in HP systems, you're investing in the future. Whether you're comparing price/performance, standards, networking, graphics, or breadth of applications, you'll find that HP has the best workstation solutions in the industry and a clear vision of future computing.

HP graphics lead the industry with high performance

Outstanding graphics are the hallmark of the Series 400 and Series 700 workstation systems. From mono or grayscale to advanced 3D color graphics, HP's standards-based graphics options deliver outstanding speed and realism. HP's new CRX-24

and CRX-24Z options on the Series 700 with 24-color-plane capability provide true color, surface rendering, and the same X Window and high performance that are common to all of HP's graphics. The chart below highlights significant graphics features for the

workstation configurations featured in the following pages of this catalog. If you would like additional information, please call our technical support engineers.

Enhance your color graphics capabilities **NEW**

PowerShade, HP's 3D Surfaces Software, enhances the performance and functionality of your existing graphics hardware.

Gain the power of dynamic lighting and shading while leveraging the high-speed performance of your system. Every PowerShade software package comes with Wavefront's Personal

Visualizer, an easy-to-use rendering program that allows users to produce highly realistic renderings and animation without a large investment in training. Supported on the Series 700 only.

CD-ROM certificate	# UJ8	

NOTE: To meet your evolving graphics needs, HP offers a variety of graphics upgrade options. If you are interested in obtaining information on graphic upgrades, call HP Apollo DIRECT and ask to speak to one of our technical customer support engineers.

HP Apollo Series 700 Workstations

The power that changed the workstation market

Compare price/performance, standards, networking, or graphics and you'll find that HP has the best RISC-based workstation in the industry — the HP Apollo Series 700.

Designed for power, the Series 700 products are the fastest PA-RISC desktop and desktide workstations and servers on the market today. Before the Series 700, performance like this could only be obtained with mainframe systems — a major powershift in the industry.

HP's commitment to open systems and standards is inherent with the Series 700 family. The UNIX-based HP-UX operating system provides a path to OSF/1™, the industry-standard operating system of the 1990s. In addition, HP's client/server and transparent networking technologies allow you to build a distributed cooperative computing environment.

HP's five Series 700 workstation models represent the broadest range of RISC-based systems today. You can count on HP's high standards of quality, reliability, and customer satisfaction to meet your needs at every level.

Model 705 **NEW**

Highest-performance entry-level desktop system

The best cost-per-seat performance solution available. The 35 MIPS, 34 SPECmarks, and 8 MFLOPS combine to set industry price/performance records. An ideal choice for a broad range of applications that require fast X Window performance and 2D/3D wireframe grayscale graphics.

Introducing the Model 710 — grayscale and color graphics available

Model 710 **NEW**

Entry level ... color high-performance

HP's new member of the Series 700 family extends the benefits of the Series 700 to more workstation users. The Model 710 is the industry's fastest desktop workstation for less than \$10,000. It offers 57 MIPS, 49.7 SPECmarks, 12 MFLOPS, and fast X Window system and 2D/3D wireframe color and grayscale graphics. The Model 710 offers the widest choice of internal removable options including CD-ROM and DDS tape drive. It is clearly the best entry-level color workstation in the industry!

Model 720

Midrange price/performance leadership

The Model 720 offers even higher performance and 3D solid graphics at a low price. With 59.5 SPECmarks, 17 MFLOPS, and 57 MIPS performance, the Model 720 is the first desktop workstation to achieve over one million 2D/3D vectors per second. This makes it the perfect hardware solution to improve productivity in 2D/3D design and wireframe applications. In addition, with the Model 720 you have the option to include one EISA slot.

Workstation Family

Model 730

Fastest desktop workstation

The Model 730 is the highest-performance workstation sitting on a desk, boasting 76 MIPS, 76.8 SPECmarks, and 23 MFLOPS. Integrated graphics include the industry's fastest X11 and 2D/3D vector performance.

Both the Models 720 and 730 can be expanded to 128-MB RAM and 840 MB of internal disk. They can be configured as desktide or desktop systems.

Model 750

Expandability and pace-setting speed

The Model 750 desktide system provides the same leadership performance as the Model 730 and has added expandability and flexibility such as a larger instruction cache and RAM capacity. For more information, call your local HP sales or telesales representative.

HP Apollo Series 400 Workstations

The leader in Motorola-based workstations

The HP Apollo Series 400 offers you a broad family of lowest-cost, highest-performing Motorola-based workstations. All Series 400 Model 425 systems redefine low-end computing by performing at 22 MIPS, 2.6 MFLOPS and 11 SPECmarks. This performance is gained by a superior architecture with the MC68040 chip at its heart.

The Series 400 represents what may well be the widest range of solutions on the market: a vast library of over 3500 leading applications and a suite of upgrade paths to future Motorola and RISC enhancements. What makes the Series 400 the industry leader in investment protection?

- Object-code compatibility with HP-UX and Domain applications
- HP's commitment to standards
- HP's promise of an ongoing upgrade path

Workstation Family

Model 425e with 19" and 16" Display.

Model 425e

UNIX[®] power at a PC price

The 425e is one of the lowest-priced, fully functional workstations on the market. It combines a small, compact desktop package with powerful graphics and the performance of the MC68040 processor.

Whether it's used as an additional node or as a standalone, it is an outstanding choice for a low-cost workstation.

The 425e delivers 22 MIPS, powerful X Window performance, and a rich array of I/O capabilities, including parallel, serial, and SCSI ports. Expandable configurations give you flexibility to match specific application requirements.

For your CASE, DTP, low-end CAD, and commercial requirements, the Model 425e is the low-price, high-quality solution that typifies HP's workstation offerings.

For DOS functionality you can choose PC-style keyboard, floppy disk, DOS emulation software, and CD-ROM.

Model 425t

The flexible desktop solution for your applications

The 425t combines the performance of the Model 425e with more powerful graphics capabilities. In addition, Model 425t HP-UX systems include an HP-IB interface card for connecting a wide variety of peripherals. Domain/OS systems include an Apollo Token Ring network card.

This flexible desktop package is an ideal solution for applications in electrical and mechanical engineering.

To step beyond 2D graphics to the visual power of 3D, call your local HP sales office for information on graphics options.

Model 425s

Powerful deskside system

The 425s deskside model offers the processing power and graphics performance of the 425t with the option of even greater expansion capability. For more information on the 425s please call your local HP sales or telesales representative.

Localization Kits

These localization kits include a keyboard, 3-button mouse and power cord. The operating system of your Series 400 determines which kit to order. For HP-UX, you can choose either the HP-HIL or PC AT keyboard model.

Specify option #ABA for the U.S. English version.

Ordering Information

Description	Product Number	Price
HP-UX Localization kit. Includes HP-UX keyboard (HP-HIL).	A1099B opt. #ABA	\$100
HP-UX Localization kit with PC-style keyboard. Includes PC-style keyboard. Supported with HP-UX 8.0.	A2205A opt. #ABA	100
Domain/OS Localization kit. Includes keyboard, mouse, and power cord.	A1098A opt #ABA	100

Series 400 Factory Integrated Options

Customize your Series 400 workstation to meet your operating needs. Use the compatibility chart below to choose from a full range of options. For memory add-ons see page 42, for internal storage add-ons see pages 50 and 51.

Ordering Information

Description	Product Number	Price

Excellent Workstation Controller performance at an affordable price

With the Series 300 workstation controller, you get the benefits of HP's long experience in and commitment to manufacturing computing products.

The Model 362 and 382 have been designed to meet your complex test engineering needs.

These systems offer unprecedented performance, flexibility, and features at an affordable price.

Object-code compatibility with the existing Motorola-based processors provides you with protection for your future upgrade path. HP's commitment to a wide range of industry standards gives you true open system connectivity. The Model 362 and 382 deliver the quality, reliability, and lasting value in controller and workstation technology you've come to expect from HP.

Model 382 with HP VEE 16" Display

NOTE: The HP 9000 workstation controllers feature the new Model 362 and 382. These systems provide enhanced 110 functionality, a standard form factor, and long product support life.

Model 362

The Model 362 controller is based on Motorola's MC68030 processor. With 6 MIPS, it is ideal for cost-sensitive Test & Measurement applications.

Built-in features include a wide range of network interfaces, a graphics subsystem, and DIO interface slot. To customize your system you can add a variety of options such as additional memory, mass storage, or secondary storage devices.

Designed as a low-cost, high-performance BASIC controller, the Model 362 supports HP BASIC/WS, HP Pascal and other third-party O/S environments. Excellent performance at an excellent price.

Model 382

The Model 382 controller offers higher performance at 22 MIPS based on Motorola's MC68040 processor. With the ECC RAM technology, extendable to 32 MB, the Model 382 boosts your productivity to levels never achieved before.

With this higher performance and larger RAM, the 382 supports the HP-UX operating system in addition to the operating environments supported by Model 362. With the HP-UX environment and the 16" and 19" resolution monitors, you can use a variety of applications to meet your engineering needs.

As a standalone dedicated controller or as part of a larger network, the Model 382 controller is an excellent solution for your growing performance requirements.

Series 300 Workstation Ordering

To simplify the selection and ordering of your Series 300 Workstation, we have pre-configured systems for you. To customize your system, there are a variety of factory options to choose from on page 15.

To complete your system, select your keyboard by ordering one of the localization kits listed below. Should you have questions concerning

configuration, compatibility, or performance, our technical customer support engineers are waiting to assist you.

Localization Kits

These HP localization kits include a keyboard, 3-button mouse, four manuals (Owner's Guide, General Usage, HP VUE Users, and Using X Windows Systems) and a power cord. Specify option #ABA for the U.S. English version.

Workstation X Window performance at X terminal prices

HP 700/RX RISC X stations are an affordable way to bring the power of network computing to the desktop of every user.

HP X stations are high-quality graphics display stations that use the industry-standard X Window System, Version 11, Release 4 protocol. They provide users with an easy-to-use, workstation-style environment. The HP family of X stations are available in a variety of color and monochrome models that range in price, performance, and functionality. They connect to an Ethernet network, operate in multivendor environments, and give the user interactive access to multiple applications simultaneously.

The low-cost family of HP 700/RX X stations complement the HP workstation family. An HP X station is a wise and secure investment even if your application needs change. Upgrade paths to an HP 9000 Workstation give you the freedom to grow as your business needs evolve. Contact your local HP sales representative for trade-in alternatives.

Benefits HP X Stations Offer

- Workstation X Window performance at X terminal prices
- Faster than competitive products at comparable or lower prices
- Industry-leading performance using RISC technology
- Interactive access to multiple applications simultaneously
- Access to multiple host systems
- Low cost per user seat
- Modular architecture
- Full support of X-based GUIs (graphical user interfaces)

Configuration Recommendations

X Station

Local Memory: 4-MB base user memory is standard with both color and monochrome models.

Expansion: Up to 18 MB total.

Application Testing:

Most applications don't exceed 4 MB when backing store is not enabled. Test the application with the base 4 MB. As a general guideline, we recommend purchasing an additional 2-MB SIMM.

Host System Requirements:

The host processing power, the amount of memory, the size and number of disk drives, and the number and variety of applications all determine how many X stations can be connected to a network.

Recommendation:

Several representative applications were tested using various hosts to determine resource requirements. Use these test results with caution, since the test environment had only one application.

Host Processing Power: 1-2 MIPS per user
Host Memory: 2-4 MB per user
Host Disk Space: 4-16 MB
Local Terminal Memory: 2-3 MB per terminal

Multivendor System Configuration

System Requirements

Boot Hosts: HP 9000 Series 300, 400, 600, 700, 800
Sun Microsystems Sun/4 SPARC-based systems

Operating System: HP-UX 7.0/8.0 or greater and Sun/OS 4.1

Interface Type: 10 Mbit/s Ethernet LAN

Protocols: X.11 R4, TCP/IP, Telnet

Supplied Utilities: TFTP, BOOTP, XDM, Font Utilities

Standard Features on all Models

Architecture

RISC Processor 22.7 MHz Intel i960CA
Compact Design Desktop, deskside, floor-mount
Memory Slots 2 single inline memory slots (SIMM)
Optional Memory Expansion Up to 18 MB of DRAM

Graphics

Colors (for color models) 256 (palette of 16.7 million)
Graphic Planes for Color Models 8
Graphic Planes for Monochrome Model 1
Display Connector 15-pin VGA (adapts to RGB)

Software

Window System X.11 Release 4
Name Server Domain-name resolver
Font Server NFS, TFTP
Software Media Options Tape, ROM card
Supported Host Systems HP 9000 family, Sun/4 SPARC family
Boot Options TFTP, NFS
Login Options XDMCP, Telnet

Communications

Network Connectors BNC and AUI (AUI requires MAU)
Network Speed 10 Mbits/sec
Network Protocols TCP/IP, 8-bit Telnet, SLIP, SNMP
Bidirectional Serial Port RS-232-C for local printer or plotter
Parallel Port Centronics for local printer
Keyboard Ports PS/2 and HP-HIL
Mouse Ports PS/2 and HP-HIL

Other HP-HIL Devices Supported Tablet, knob box, button box

Mouse		PS/2 3-button				

* Also supports display resolutions of 800 x 600 at 72 Hz and 640 x 480 at 60 Hz.

Ordering Information

The HP 700/RX includes Base Unit and power cord, monitor, PC-101 PS/2 keyboard and cable, PS/2 3-button mouse, 3-conductor monitor cable, and installation manual. If you would prefer an HP-HIL keyboard model, order option #1A2 and this will delete the PC-keyboard model. With either keyboard model, specify option #ABA for the U.S. English version of the localization kit and 2-MB SIMM.

NEW

NOTE: Two SIMM slots are available in each unit, the SIMMs installed in slots must be identical. With a 4-MB system, a 2-MB SIMM is included for customer installation in one slot therefore you can either add a 2-MB SIMM or use Option #AN7 and then order two 4-MB or 8-MB SIMMs for increased memory.

HP-UX and Domain/OS Accessories

Working in Three Dimensions is easy with Spaceball—
Now compatible with HP-UX and Domain/OS

Take full spatial control of your graphic images with the Spaceball input system. Spaceball is the ideal solution when using 3D software packages like HP-ME30, McDonnell Douglas-Unigraphics, and SDRC-Ideas. Just grasp the easy-to-use ball and push, pull, or twist; Spaceball lets you slide and rotate an image in X, Y, and Z axes. Spaceball also lets you "walk through" a design, building layout, or 3D scene. And with its dominant mode, Spaceball lets you

lock in motion along an axis based on the dominant force being applied to the ball. Attaches to 25-pin serial port. Supported by Spaceball Technologies. Includes Domain/OS and HP-UX software driver, RS-232-C interface cable, power supply, and HP adapter cable kit.

Workstation Family

HELPFUL HINT:

HP-HIL DOs and DON'Ts

- The maximum number of addressable devices is seven (eight including the HP-HIL device itself).
- Generally, the maximum cabling length is 2.4 meters (8 feet) per device, and the total length limit is 21 meters (69.3 feet). If using the 46082 remote extension, total length limit is extended to 48.6 meters (160.4 feet).
- The total power consumed by all devices on the link must be 12 Watts or less (100 mA at 12 V dc). Series 300 and 400 systems have ample power for all configurations of up to three devices, and all configurations of up to seven devices that do not include the 46085A.
- If any device has only one HP-HIL connection, it must be the last device on the link. Examples include the M1309A Trackball and the 46060B mice. If you require both a mouse and a trackball, specify the K1410 quadrature mouse and 46094A quadrature adapter.

Model #SPTL-2003NA Spaceball

Workstation and Peripheral Maintenance Services

Personal support from HP Response Center professionals provides solutions to your workstation problems.

Workstation Services. HP Apollo Comprehensive Maintenance services for workstations provide you with high-quality support that enables you to maximize computer system uptime and productivity. Hewlett-Packard's professionalism and commitment to quality ensure that you receive maximum availability from your HP computer products.

With HP Apollo Comprehensive Maintenance services, you get the full features and benefits of HP's hardware, software, network, and peripheral services in a simplified package, priced lower than purchasing the individual support services. An HP Apollo Comprehensive Maintenance contract provides the following services for your workstations and network:

- **Onsite hardware support:** Maximize computer system uptime with assistance from local HP engineers.
- **Network support:** Whether your network environment is a single site of

HP Apollo Workstations or is a multivendor, multisite configuration, HP provides both local and remote capabilities to ensure maximum availability of your network.

- **Telephone and remote problem solving assistance:** Enhance system productivity by working with experts or information databases at the HP Response Center to quickly solve your computing problems.
- **Software updates:** Enhance your system performance and maintain compatibility with new hardware, software, and peripherals with the latest software fixes and enhancements.

The HP Apollo Maintenance program offers you three alternatives for purchasing support based on your specific business needs. You may choose from:

- HP Apollo Comprehensive Maintenance services which cover your total hardware, software, network, and peripheral support needs in a single product offering at the best price.

CALL...
HP Apollo DIRECT
*for more
information*

- HP Apollo separate services enable you to purchase separate hardware and software contracts when full coverage is not required.
- HP Apollo Custom Support Plan lets you mix contractual support with other support services such as education and consulting.

Peripheral Services. As the owner of an HP peripheral product, you are looking for maximum productivity and uptime at the lowest possible cost.

If you do not choose to include your peripherals in an HP Apollo Comprehensive Maintenance Service contract, you may select from several other alternative HP service agreements.

- Priority support provides service onsite within 4 working hours of your call.
- Next Day Support ensures service onsite within 1 working day of your call.
- HP Customer Return Services offers the most economical support and enables you, at your convenience, to bring your peripheral to an HP local service office.

HP Apollo Service and Support

Consulting Services

The HP consulting program provides technical expertise and worldwide resources to help you get the most from your HP workstation and related applications. From a thorough understanding of your individual needs, our skilled consultants develop a solution that enables you to increase your productivity without taking additional time from critical technical resources.

Throughout the planning, implementation, and operation of your business cycle, our consulting professionals work with you to implement quality solutions so that you can focus more fully on your business goals and markets. Areas of focus include:

- Needs assessment
- Migration planning
- Network, database planning, and design
- Implementation assistance

Multivendor Networking Services

To stay ahead of your competition, you rely on your multivendor network. Being assured that your network optimally supports your organization's needs can only be accomplished through effective planning, flexible design, reliable products, thorough training, consistent quality maintenance, and effective monitoring and operations.

Hewlett-Packard gives you a vast resource of networking professionals who have years of experience. Whether your network reaches around the corner or around the world, HP will, by acting as your single point of contact, ensure quality design, implementation, and operations. We offer services in the following areas:

- **Network Requirements Analysis and Planning**
In-depth study of network requirements to meet business needs and objectives.
- **Logical and Physical Design**
Evaluation of networking technologies, hardware, and software components, producing the solution that meets your needs.
- **Network Implementation**
All aspects of the network are installed, labeled, documented, and tested to agreed acceptance criteria.
- **Network Operations**
Maximize the uptime of your network through 24 x 7 monitoring and operations, change management, and service reporting.

information

Our Network Support Program has dependable experts throughout the world, so all your locations get personal, professional help.

Hewlett-Packard offers a wide range of customer training for HP-UX and Domain/OS operating systems.

Hands-on lecture/lab style courses are regularly scheduled at education centers throughout the world. All courses can also be taught to a dedicated group at your site, an HP sales office, or an HP education center.

A brief summary of training courses for workstation products featured in this catalog is provided below.

In addition to these courses, we also offer a wide range of courses on networking, UNIX software development, OSF technology, and open systems.

UNIX System Basics I

2 days 51489S.....\$595
Application users or system administrators in a run-time only environment learn basic UNIX system concepts required for day-to-day operation.

Fundamentals of the UNIX System

5 days 51434S.....\$1,495
Programmers or full-time system administrators receive in-depth coverage of the UNIX operating system and basic shell programming.

HP-UX System Administration Basics

3 days 50722S.....\$895
System administrators in a run-time only environment learn basic tasks required to maintain an HP-UX system.

HP-UX Workstation Administration for the HP 9000 Series 300/400/700

5 days 51436S.....\$1,650
Full-time system administrators receive comprehensive coverage of system administration tasks and responsibilities.

HP OpenView NM Server Programming Fundamentals

5 days 22885S.....\$1,750
Application developers learn how to use programmatic interfaces and diagnostic tools to develop an HP OpenView network management application.

HP LAN Manager/X for HP 9000 Systems Fundamentals

3 days B2781S.....\$1,050
Learn how to plan, install, and manage a PC network using HP LAN Manager/X.

Programming with OSF/Motif

5 days 50767S.....\$1,750
Software developers learn how to use OSF/Motif to create graphical user interfaces.

Introduction to PHIGS Programming

5 days B1682S.....\$1,750
Programmers learn how to use the PHIGS graphics library to develop and run applications.

Introduction to SoftBench

3 days B1630S.....\$1,050
Learn how to use SoftBench for the edit, compile, and debug phases of the development life cycle.

Introduction to Encapsulator

2 days B1631S.....\$750
Learn how to use Encapsulator software with SoftBench.

C++/Object-Oriented Programming

5 days B1810S.....\$1,495
Learn how to develop programs with the C++ programming language.

ANSI C Programming

5 days 35130S.....\$1,495
Learn how to develop programs with the ANSI C programming language.

Introduction to the Ada/300 Development System

5 days 31124S.....\$1,495
Learn how to develop programs with the Ada programming language.

Pascal Programming

5 days 31112S.....\$1,495
Learn how to develop programs with the Pascal programming language.

Programming in FORTRAN 77

5 days 50698S.....\$1,495
Learn how to develop programs with the FORTRAN programming language.

HP Apollo Workstation Software

Computers and workstations are judged not only by their power and performance, but also by their operating system and available software. HP-UX and Domain/OS operating systems give customers a

wealth of development tools, such as those shown in this catalog. In addition, there are over 3,500 application solutions available through our VARs and third-party software vendors.

HP has published a software solutions catalog for HP-UX and Domain/OS users. For details on how to order a copy, see page 38.

HP-UX Software

The HP-UX operating system is a multiuser, multiprogramming operating system. It provides the maximum operating system capabilities that are available for HP 9000 Series 300, 400, and 700 systems. HP-UX capabilities include support for an extensive array of programming languages, subsystems, and applications.

HP-UX Licensing, License Upgrades, Media, and Documentation

The base license for Series 300, 400, and 700 Workstations is a two-user license to use HP-UX. The bit-mapped console of a workstation or a terminal connected to a System Processor Unit counts as one user. LAN, if present (with any number of interfaces), counts as one user. Workstations that are limited to one bit-mapped console and one LAN interface use the two-user license. A workstation or network server that requires more than one direct-connected or modem-connected terminal, such as a network server supporting ME Series 10, exceeds the two-user license; its license must be upgraded to an 8- or 32-user license.

Licensed software can be made available for installation in licensed systems by:

1. Purchasing the corresponding media and documentation
2. Copying the licensed software to the licensed system
3. Installing the licensed software from a previously purchased media and documentation product.

NOTE: The system license must match the software revision being installed. For example, an HP-UX Release 8.0 license is required for license installation and use of the HP-UX Release 8.0 software. Users upgrading software to current versions are required to purchase complete new license, media, and documentation.

Domain/OS Software

Domain/OS allows customers to operate in any of three workstation environments: UNIX® system V.3, Berkeley UNIX 4.3, or the proprietary AEGIS operator system.

Usually, at the time of purchase, a node license for the current version of the operating system is included with the workstation. Media and documentation for the operating system is sold separately; see page 26 for ordering information.

Customers must purchase licenses to run optional Domain/OS software. All software is subject to standard HP terms and conditions. Brief descriptions of the types of licenses follow:

Domain/OS License Options

Node License: A license to run on a single, specific node. (Each node using the software is required to be licensed, including diskless nodes.) Discounts for Node Licenses are per customer's appropriate discount schedule. Node Licenses usually include media and documentation.

Development Node License: A type of Node License required for the development of applications software. Only the nodes developing applications using this software are required to purchase this type of license.

Run-Time Node License: A type of Node License required to run applications that were created using development licensed software. These licenses are priced less than development licenses. Some development license software does not require a run-time license. In these cases there is no license or fee for nodes running the resultant applications.

Corporate License: A type of quantity license agreement for the purchase of Node Licenses (development or run-time) at a reduced price. Quantities can be determined without any network or geographical restrictions. To qualify, the total quantity used to determine the discount must be ordered on one purchase order. Since quantity breaks are scheduled, customer discounts do not apply. Corporate Licenses do not include media or documentation.

Gateway License: A license for a communication product that runs on a single node but provides a service for users running on other systems. Although multiple users may benefit from the services provided, only the node running the software needs to be licensed.

"We're here as a resource to help you get maximum productivity from your HP Apollo Workstations. If you don't see something you need ask us."

HP-UX 8.0

Unbeatable value based on standards

If you are searching for an operating system which will meet the needs of your organization, look no further. HP-UX is your best value in a standard-based operating system.

HP-UX protects your investment by adhering to current and emerging industry standards (POSIX IEEE 1003.1/XPG 3/SVID2/FIPS 151-1). This means your application can grow from one computing system to another. A growth path and a wealth of value-

added features help your organization save time and money.

What's more, this multiuser, multi-programming operating system gives you flexibility to add your hardware needs from a broad range of workstations up to powerful supermini-computers.

All HP-UX workstations include a 2-user license-to-use for the Run-Time environment. Instant Ignition delivers the Run-Time environment of HP-UX pre-installed and pre-configured on your workstation's internal disk. This is included with pre-configured

Software

workstations and/or can be ordered as an option.

All HP-UX 8.X Run-Time Environment products listed include installation documentation, HP VUE, NFS, ARPA, SAM and run time support for X.11, OSF/Motif™, Starbase, Starbase display list, NCS, and NetLS.

Documentation for HP-UX is available on long-lasting CD-ROM or as hardcopy. When ordering you must identify the corresponding product number for either the Series 300, 400, or 700 along with the option number, specifying media, content, or license you have chosen.

DMX—Domain Display Manager on X Windows NEW

DMX is a tool that allows you to use an HP-UX workstation in very much the same way that you use a Domain workstation today. DMX is an X Window-based, Motif implementation of some of the key features of the Domain Display Manager. With DMX installed you get most of the DM editing features and some of the pad behavior from Domain on your standards-based HP-UX workstation.

The key features of DMX are:

- DM-like editor with DM commands, including cutting and pasting.

- Input/Output pads, including infinite scrolling of the output pad.
- Dynamic softkeys, allowing you to customize the keyboard to your needs.
- A common editor in editing and pad windows.

DMX works with any X Window manager you choose and is a good X client that supports the cutting and pasting features between DMX and non-DMX windows.

Software

By using DMX, you can quickly and easily move from a Domain workstation to an HP-UX workstation and maintain the same high level of productivity you've become accustomed to. With DMX, you *can* take it with you! **Product will be available for shipment after May 22, 1992.**

HP OpenView Network Node Manager for HP-UX and SunOS

Today, your success as a network manager depends on your ability to envision new ways to do more with less: better manage the diverse equipment and software installed in your environment, improve productivity, and reduce your operating costs.

To find insightful solutions to these master challenges, you need a rich set of tools. You need the solution chosen by users as the best overall standards-based fault, configuration, and performance management solutions for multivendor TCP/IP (Transmission Control Protocol/Internet Protocol) networks of interconnected LANs. You need the HP OpenView Network Node Manager.

Network administrators can understand the health of their network at a glance. With innovative capabilities including Discovery, Single View Management, and the Application Builder, HP OpenView Network Node Manager 2.0 greatly reduces the time and effort users must spend managing their networks.

HP OpenView Network Node Manager automatically discovers, maps, and continuously monitors all network and system resources across a TCP/IP network. As the network changes, the Discovery capability automatically shows the changes and updates the network map. Users can gather historical information for any numerical MIB element on any Simple Network Management Protocol (SNMP) device or group of devices

and trigger alarms based on user-defined thresholds. This information can be imported into popular spreadsheets or SQL databases.

In a matter of minutes, new or existing applications are integrated into the HP OpenView user interface and network map. This Single View Management capability protects your current investment and gives you control through a single, consistent view of the network.

The Application Builder creates a management application to graphically or textually display network device information and execute programs to handle network alarms without any programming. In as little as one minute, you can build applications to manage network devices and resources that use the industry-pervasive, multivendor SNMP. Customized user documentation is automatically integrated into the indexed, online user documentation. This powerful tool captures the expertise of the network administrator into the HP OpenView solution.

These automated features allow one person to manage all the LANs on an entire TCP/IP site or campus rather than just individual workgroups—saving time, effort, and money. Using HP OpenView Network Node Manager reduces network operating costs and improves service levels. Investing in HP OpenView Network Node Manager today provides the fastest path to OSF DME technology.

Best Overall

HP OpenView Network Node Manager

Top scores in far more categories than any other product gave Hewlett-Packard the top honors in this DATA COMM User Survey.

Data Comm is a networking technology magazine.

HP OpenView TCP/IP Agent

HP OpenView TCP/IP Agent provides the capabilities necessary to manage HP 9000 Series 300, 400, 700, and 800 computer systems fully supporting the Simple Network Management Protocol MIB I and II. It provides network information such as traffic into and out of a node, as well as system information, such as CPU load and disk space, to SNMP management applications such as HP OpenView Network Node Manager.

The HP OpenView TCP/IP Agent is bundled with all Series 300, 400, and

HP OpenView Extensible SNMP Agent

HP OpenView Extensible SNMP Agent is a tool for managing systems and applications via the Simple Network Management Protocol (SNMP). It provides all of the capabilities of a standard SNMP agent, plus the capability for system administrators to extend the capabilities of SNMP applications like HP OpenView Network Node Manager to manage not just network devices such as routers, and hubs, but also to manage systems. Without any C language programming, the Extensible Agent can manage the complexities of distributed systems by customizing the agent to particular systems and applications to be managed.

The HP OpenView Extensible SNMP Agent supports standard Management Information Base (MIB) II objects, as well as all the objects in the basic HP OpenView TCP/IP agent. In addition to these standard objects, users and developers can specify their own objects, allowing them to custom-tailor their SNMP management to their own environments.

HP OpenView Extensible SNMP Agent is a key building block in developing complete, centralized system and network management solutions. Versions are available for HP 9000 Series 300, 400, 700, and 800 systems, as well as for Sun SPARC systems.

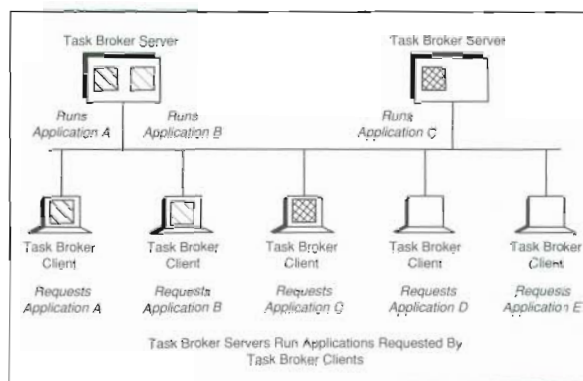

Increase your efficiency in the distributed computing environment

Task Broker

Task Broker provides efficient access to computers across a network. The software application selects the best computer on a network to run a batch-type task, transparently transfers its associated data to the selected computer, and sends the results back to the user upon completion of the task.

Note: Licenses are restricted to a LAN—all systems connected to the same physical Ethernet or Token Ring

Domain/OS and HP-UX systems share a common account management system

Passwd Etc. NEW

Passwd Etc. controls the login and password information for distributed systems. Passwd Etc. is the client side of the Domain/OS Registry. It allows users to administer account data for both Domain/OS and HP-UX systems through the same tool. The software for the Domain/OS systems is bundled with the Domain/OS; for HP-UX the software must be ordered separately. The server must be a Domain/OS system.

HP OmniBack

HP OmniBack is a global network backup management solution that provides central file system backup and recovery. It automates the backup process for all machines in a distributed HP-UX and Apollo Domain environment. In addition HP OmniBack provides sophisticated scheduling and journaling facilities.

To receive the complete product, order the following:

- one base license
- one node license per workstation
- one platform software product

NOTE: HP OmniBack is required to back up 8mm 2.3-GB tape drive (HP Apollo only) see page 55.

HP GlancePlus — A Window into your Systems

HP GlancePlus software is an easy-to-use online performance monitoring tool that helps you get the most from your workstation investment. This software tool shows at a glance how your workstation resources are being used and who is using them.

With HP GlancePlus, you can quickly pinpoint and resolve performance

bottlenecks when they occur, thus maintaining high productivity for your users and systems staff. Using HP GlancePlus you can:

- identify and correct problems when work is running slowly
- monitor memory, CPU, and I/O usage by process and by user
- manage NFS and diskless workgroup
- balance disks and tune file systems for improved I/O performance

Software

HP GlancePlus is available for all HP-UX systems and is now available for Sun SPARCstations. A 60-day trial software is also available so you can look before you buy (you may apply the \$50 trial fee toward your license purchase).

So say goodbye to guesswork, and get going with HP GlancePlus software!

LAN Manager/X for HP-UX

HP LAN Manager/X is an advanced network operating environment that enables HP-UX computers to operate as file and resource servers to MS-DOS®, Windows 3.0, and OS/2 PCs.

HP LAN Manager/X also lets you use standard LAN Manager applications distributed across the network between HP-UX systems and PCs.

HP LAN Manager/X features include the following: Network file and

peripheral sharing, sophisticated network administration and management tools, comprehensive printer management and print spooling, advanced security system, Application Program Interfaces (APIs), and station-to-station messaging.

[1] & [2] Server requires a minimum of 8 MB of memory, Ethernet connection, and the appropriate LAN link product.

Integrate HP-UX networking services on your PC

Network Services

HP Network Services 2.1/MS-DOS and HP Network Services 2.1/MS-DOS for NetWare, provide a PC running MS-DOS with Network File Transfer, and Network Interprocess Communication to your HP-UX system. These services supply a complete and sophisticated set of communication facilities between the PC and HP-UX, complementing HP's LAN Manager and NetWare solutions.

HP ARPA Services

With HP ARPA Services 2.1/MS-DOS and HP ARPA Services 2.1/MS-DOS for NetWare, a PC running MS-DOS can communicate with your HP-UX system for terminal emulation (Telnet) and information access and transfer (FTP). Save money by leveraging your investment and sharing resources through the convenience of your PC.

We have a number of options available with these products to meet your needs. You must order the product number along with the option specifying the content or license you wish.

HP SharedX — A Revolutionary New Communication Tool Version 1.1 **NEW**

If a picture is worth a thousand words, imagine showing your computer screen to someone across town instantaneously? If you're using HP SharedX, you could do it today!

HP SharedX does for computer screens what Fax did for paper documents. Instead of trying to describe your display to someone over the phone, you can send it! And it's better than Fax because you both see the real thing, real time, not a snapshot.

HP SharedX lets you share existing application windows with one or several users simultaneously. Now you can have tele-conferences where each participant can hear (via the telephone), see, and input to the information displayed on your screen, immediately!

HP SharedX allows receivers of your X.11 Windows to input to the window as if they were typing on your keyboard, and clicking your mouse. No more printing your output, sending paper, and waiting for the corrections and comments to come back.

Only the sender needs HP SharedX; receivers only need standard X Windows on their workstation or X terminal and a network connection to the sender.

With HP SharedX, sharing has never been easier!

HP-PHIGS **NEW**

PHIGS is the ANSI/ISO standard interface for 3D graphics. HP-PHIGS is a native implementation that delivers full graphics performance in an X window via Direct Hardware Access technology.

GMR for Domain/OS

GMR is a world coordinate graphics package providing for the storage, editing, modeling, and viewing of primitives and attributes; it also includes advanced lighting, shading, and rendering functions which can be used with PHIGS data structure.

[2] Supported on HP-UX 8.05 and 8.07

PC Integration

Now run DOS applications on your HP-UX or Domain Workstation.

SoftPC for HP-UX

SoftPC is based on Insignia Solutions, Inc. software emulation technology and the Intel 80286 processor. It provides a complete PC AT environment via software-only emulation. Because the software performance is contingent on the CPU

performance, customers will find better performance of the emulator software on higher performing workstations.

System Requirements:

Operating System: HP-UX revision 8.0 or later
System Memory: 16 MB minimum recommended
Disk Space/Size: 10 Mbytes
Graphic Interface: CGA, Hercules, EGA, VGA, Super VGA

PC Emulator for Domain/OS

Optional software license which provides an IBM PC-compatible DOS environment in a workstation window. Emulates monochrome, Hercules, and CGA graphics.

System Requirements:

System Memory: Minimum 4 MB
Operating System: Domain SR 10.2 plus PSK7

SoftBench

SoftBench provides an open, distributed CASE tool integration framework on multiple platforms that enables you to customize and extend your software development environment. SoftBench includes the SoftBench Framework and an integrated set of program construction tools for construction, test, and maintenance of C, and ANSI C. It allows you to design an environment that improves your software development productivity by automating tasks and processes, resulting in reduced complexity, repetition, errors, and rework.

SoftBench Encapsulator

Unique in the CASE market, HP's SoftBench Encapsulator allows you to customize and enhance your software development environment. New tools can be added to the SoftBench Framework, processes can be automated, all without having to change source code. Encapsulated tools have the same user interface as the rest of the environment and can communicate with other tools in the environment.

C++ SoftBench

C++ SoftBench hides the complexity of development in an object-oriented paradigm. It is a full-scale C++ and C programming environment based on the SoftBench Framework, allowing integration of CASE tools to create a comprehensive environment tailored to your needs. C++ SoftBench targets the construction, test, and support phases of software development with advanced C++ tools and libraries of data abstraction components. HP C++ Developer, which is tightly integrated into C++ SoftBench, allows C++ programmers to graphically view, construct, and edit classes and class hierarchies in C++. C++ Developer is offered standalone for those customers who cannot take advantage of the benefits of a fully integrated object-oriented environment.

An open, flexible system for management and distribution of application licenses

Network License System

HP's Network License System (NetLS) is a software toolkit that enables application vendors and end users to match software costs to actual usage. NetLS manages, enforces, and monitors application usage and usage policies across a distributed network. In fact, it has been selected by the Open Software Foundation® for inclusion in its suite of products forming a complete, open software environment.

NetLS supports CPU-locking and site licensing methods as well as the more flexible concurrent-use model. It also features a number of additional

licensing types as well as a mixed licensing scheme to tailor your software to meet your customer needs.

NOTE: Ports of NetLS for non-HP platforms are available from Gradient Technologies, HP's partner in NetLS marketing and development, please call (508) 562-2882 for more information.

Software

NetLS makes the management and distribution of licenses easier.

NCS/NIDL for HP-UX and Domain/OS

Network Computing System (NCS) software allows your customers to operate more efficiently in a multivendor computing environment. NCS is a keystone to new industry standards for distributed computing. NCS has been adapted by the Open

Software Foundation as the industry-standard remote procedure mechanism.

NCK is the run-time portion of NCS. It contains the library functions that implement the remote procedure

call facility along with global and local location brokers and administration tools. NCK is bundled with the HP-UX and Domain/OS operating system. The NIDL compiler allows application programmers to develop distributed applications using NCS.

[1] HP-UX Version 1.5.1 Domain Version 2.0

HP Visual Engineering Environment (HP VEE)

HP VEE, a state-of-the-art graphical programming environment, lets you select and link visual objects or icons to create complete solutions. If you can construct a block diagram or schematic, you can create elegant solutions to many of the problem modeling, data analysis, and data presentation problems you face each day.

HP VEE provides objects and icons which perform a function or set of functions for data collection and generation, data analysis, and data presentation. HP VEE offers over 250 objects, most of which perform functions which would take tens to hundreds of lines of code to implement in textual programming languages. Since the details of syntax, semantics, and low-level implementation are taken care of for you, you don't spend as much time programming and you can spend more time focusing on results.

With HP VEE, you can spend more time focusing on results.

HP VEE-Engine, the core product, can be ordered from this catalog. It is ideal for problem modeling and for analysis of data collected from files, other programs, or mathematically generated. HP VEE-Test, a superset of HP VEE-Engine, adds objects for instrument control from HP-IB (IEEE-488, GPIO, and RS-232 interfaces.) To order HP VEE-Test please contact your local HP Sales Office.

HP Software Solutions Catalog

Hewlett-Packard's HP-UX and Domain/OS Solutions Catalog provides information on applications developed by HP and its value-added businesses. The HP Solutions Catalog contains complete descriptions and

contact information for more than 3,000 U.S. solutions, plus the catalog is indexed by company, market, and application.

A limited supply of HP Solutions Catalogs are available by calling HP Apollo DIRECT at 800-637-7740 and asking for publication 5091-2354EUS.

If you like Lotus 1-2-3 then... you'll love Lotus 1-2-3 for HP-UX

Lotus® 1-2-3® is now available on HP Apollo workstations running HP-UX! You can now take advantage of the greater power and larger memory capacity that HP workstations provide.

Lotus 1-2-3 for HP-UX is 100 percent keystroke, macro, and file compatible with Lotus on PCs and other platforms. Full compatibility with HP VUE allows access to multiple open windows and multiple work environments. The power of HP's LAN Manager/X allows information to be retrieved, updated, and shared directly from the corporate database, PC users, or other workstation users on the network. Worksheets already created on your PC are compatible with and run on HP-UX. And there's very little training involved with Lotus 1-2-3 for HP-UX since familiar 1-2-3 menus are retained.

Lotus 1-2-3 for HP-UX lets you make the most of your environment with support for multitasking, background processing, virtually unlimited spreadsheet size, Network File System, and SharedX. With Lotus 1-2-3 for HP-UX and HP SharedX you can achieve real-time sharing of X-based

applications between two or more users. Thus, updates are seen by networked users immediately, making for better decisions faster.

And to ensure you get the most out of your investment in software, Lotus customer support-line offers "round the clock" service 365 days per year. This is further enhanced with extensive third-party support such as books and seminars on 1-2-3 for Scientists and Engineers to videos, user groups, and Lotus courseware.

Lotus 1-2-3 for HP-UX requires HP-UX 7.0 or later plus 8-MB memory (12 MB if using X Windows) and 17-MB hard disk space preferred.

"Floating user" licenses make access to Lotus 1-2-3 even easier and less costly. Now, any predetermined number of users can access Lotus 1-2-3, when they need it.

Island Graphics

Integrated desktop publishing tools combine WYSIWYG word processing, advanced page layout, and graphics for HP and Apollo workstations. Comprised of three integrated packages: Island Write, Draw, and Paint, let you create impressive, brilliant documents faster and easier than you thought possible. Each program runs under the X Window system with OSF/Motif™ graphical user interface.

IslandWrite combines full-featured WYSIWYG word processing with powerful page layout tools. Write easily imports spreadsheets, graphics, EPS, TIFF, Paint, and Draw files, and includes a filter which converts FrameMaker MIF, Interleaf, Microsoft® Word, and WordPerfect files to and from IslandWrite.

IslandDraw is an object-oriented graphics editor for creating drawing, diagrams, organization charts, and overhead presentations. Its toolbox includes all geometric shapes and Bezier curves. Draw opens many graphics formats including PostScript, EPS, CGM, and HPGL. You can bring your CAD drawing into Draw for annotation and inclusion in your Write reports. Also, you can bring your Wingz and Lotus 1-2-3 graphics into Draw, and enhance and add to your reports.

IslandPaint is a raster editor that lets you create freeform art, modify clip art, and touch-up scanned images. Paint stores its files in TIFF format and reads and writes other formats including MacPaint, Sun Raster, Group 3 FAX, GIP, X.11

Impressive, brilliant documents made faster and easier.

bitmaps, X.11 Window dumps, and more. Paint is the easiest to use and the least expensive color bitmap editor available.

Island Productivity Series™ requires HP-UX 7.0 or later or Domain/OS 10.2 or later.

Wingz makes it easy to combine text, charts, and graphics into powerful spreadsheets

Wingz™ by Informix®, is a powerful spreadsheet and presentation package. Based on the X Window system, Wingz incorporates the OSF/Motif graphical user interface.

Wingz lets you combine text, 3D graphs, charts, scanned images, freehand illustrations, and worksheet data in any combination within the same spreadsheet. Now, with Wingz on your workstation, you have the additional power, functionality, and networking capabilities to produce outstanding, page-perfect presentations.

Wingz is built around a tremendously powerful application development language called HyperScript®. Even novice users can customize worksheets for maximum efficiency with this feature. Wingz also features DataLink. This utility allows your desktop to become a "point and click" front end for Informix-SQL databases.

Wingz requires HP-UX 7.03 or later or Domain/OS 10.2 or later.

ADD-ONS AND UPGRADES

ADD-ONS AND UPGRADES OVERVIEW

Memory Add-Ons	page 42
DN Series Upgrades and Controllers	page 44
HP Series 300 CPU Upgrades	page 45
HP Apollo Series 400 and DN Series CPU Upgrades	page 47
Expanders and Adapters	page 48

Build on the Strengths of Your Current System

When you demand more from your HP Apollo Workstation than it's equipped to give you, HP has the solution with add-ons and upgrades engineered with the same quality standards as your HP Apollo system.

Adding memory to your workstation will increase the performance of your system so that you can run more demanding applications and reduce your wait time between commands. There's no easier way to enhance your system's performance and reliability.

If it's more computing power, flexibility, or newer technology that you want, you can trade in your current CPU for a higher performing CPU. HP wants to make it easy for you to upgrade your system without the time and expense of starting over.

Increase your performance with more memory

HP memory add-on options let you keep pace with the higher memory requirements of single-user and network applications. By adding memory to your workstation, you can

- Improve data throughput
- Use more robust applications and tools such as Windows/Motif

- Increase the performance of your applications

HP gives you high-performance, high-quality memory for your workstation. The newest products—Models 345, 375, 380, and the Series 400 models—have ECC single-bit correct, double-bit detect memory.

NOTE: We recommend Model 330, 350, 360, and 370 users consider system upgrades for best price/performance. See page 46 for more information.

DN-Series Hard Disk Upgrades

Upgrade the internal storage space on your HP Apollo workstation. You can select a Hard Disk Upgrade Kit or a Disk Subsystem Upgrade Kit to

increase your capacity. The Hard Disk Upgrade Kit includes the disk and Customer Engineering installation, however, your system must

already have a disk controller, to operate. The Disk Subsystem Upgrade Kit includes the disk, disk controller, and Customer Engineering installation.

HP Series 300 CPU Upgrades

Add-Ons and Upgrades

Hewlett-Packard gives you the best investment protection in the industry.

That's why it's easy to decide to buy HP systems today with the confidence that your investment will pay off for many years to come.

The CPU upgrade program allows you to trade in your current CPU (and in some cases memory) for a higher-performance CPU.

Follow these steps to return upgrade material and get proper credit:

1. Call 603-772-1500 Ext 3641 for upgrade equipment return authorization.
2. Mail product to:
Hewlett-Packard
200 Domain Drive
Exeter, NH 03833
Attn: Asset Management
Department

3. Make sure the Upgrade Equipment Return Authorization number is marked clearly on the box and in the packaging material.

Upgrade for Models 310, 320, 332 to MC68040

CPU Field upgrade kit includes 25 MHz MC68040 SPU, 8-MB ECC RAM, and 14-inch VGA color resolution monitor.

Ordering Information

From:	To:	Description:	Product Number	Price
MC68030	MC68040	Model 310/320/332 CPU Field Upgrade Kit to MC68040	A2244A	\$6,500
		Delete VGA monitor	Opt # ADY	(\$400)
		Substitute 1024 x 768 Graphic System for 640 x 480 Graphics System	Opt # ADX	2,500
		Return credit for 310 or 320 CPU board and monitor	Opt # 200	(\$1,000)
		Return credit for 332 CPU board and monitor	Opt # 201	(\$1,500)

Upgrade for Model 310 to Model 332

CPU upgrade kit includes MC68030 processor board with 1-MB RAM and medium resolution interface (512 x 400). You may add on 1-MB RAM (for a total of 2) or a floating-point accelerator. Requires HP-UX 6.5 or later.

CPU Board

Series 400 and DN Series CPU Upgrades

Add-Ons and Upgrades

Upgrades for Model 400s and 400t to Model 425s and 425t

Field upgrade kit includes 25-MHz MC68040 daughter board, an optional two-user license for HP-UX or Domain OS, media, and documentation.

Domain/OS 400 customers can also order an option to convert ISA slots to EISA slots.

NOTE: To upgrade, return your 50-MHz MC68030 board to HP. Options AAR and AAS must be ordered with corresponding upgrade kits.

Ordering Information

From	To	Description	Product Number	Price
400s	425s	HP-UX upgrade HP-UX, Version 7.05 Update media and manuals	A2044A Opt # AAR	\$2,000 595

Trade-In Program

You can now trade-in your older workstations from HP Apollo, and select Sun, DEC, and IBM systems, and receive up to \$4,500 credit towards the purchase of the following high-performance HP Apollo systems:

Series 700: Models 720, 730, and 750

Series 400: Models 425e, 425t, 425s, and 433s

Series 300: Models 380

DN Series: Model 5500

Call your local HP sales office or your telesales representative for more information on our trade-in program.

Series 300 DIO-II Expanders

The DIO-II Expander allows you to add two DIO-II slots and two DIO slot pairs to your 360/370/375 Workstation. If you would prefer, you can choose to delete the two DIO slot pairs to provide a total of four DIO-II slots by selecting option #004. A maximum of two 98570A's can connect to your workstation SPU as shown in the diagram to the right. You can mix the standard 98570A product and the option, or you can have two of each.

Description	Product Number	Price
Series 300 DIO-II Expander Add two DIO-II slots and two DIO slot pairs. Delete the two DIO slot pairs for a total of four DIO-II slots.	98570A opt. #004	\$2,455 (\$400)
Model 340 Add-On Add one DIO slot to a 340 without a DIO slot	98013A	1,500
Series 400 DIO-Adapter Converts one DIO-II slot to a DIO-I/O slot and DIO accessory slot. Maximum of two per workstation.	A1401A	400

HELPFUL HINT:

Five different types of cards are used in the Series 300. How these cards use slots affects the type of I/O extender/expander you will need to order. While there are only two types of slots, DIO and DIO-II, there are five types of cards that fit into the slots, as well as "daughter" boards that can be added to some "mother" boards without taking up any DIO or DIO-II slots. The Series 400 has DIO-II slots only; these can be converted to DIO-I/O with an adapter.

DIO-I/O

DIO-I/O cards have a 16-bit data path and 24-bit address bus. They are 5 x 7 inches, consume one DIO slot, and have a coverplate containing the I/O cable connector that covers the slot. The cards may be placed in any DIO-I/O slot, which is the lower of each DIO pair of slots.

DIO-Accessory

DIO-Accessory cards have a 16-bit data path and are 5 x 7 inches. They have no coverplate or cable connectors and therefore use only one slot per board.

DIO-II I/O and DIO-II/System

The DIO-II I/O cards have a 32-bit data and address path, and are 8 x 11 inches. Some boards are designed to perform as a "mother" to certain "daughter" boards.

DIO-II/System Bus cards have a 32-bit data and address path, and plug into the 8 x 11 inch DIO-II slots. These System Bus boards also have a second high-speed private/synchronous 32-bit bus.

Depending on your needs for DIO or DIO-II slots, the chart to the left shows how you can add additional slots with expanders.

DIO-System

DIO-System cards also have a 16-bit data path and a 24-bit address space. These 8 x 11 inch cards fit in the bottom two slots of a 310 or 332 and in the DIO-II slots of other systems.

MASS STORAGE, PRINTERS, AND PLOTTERS

Be Prepared for the Information Age

Because this is the information age, you're faced with unprecedented quantities of data. With the emergence of open systems, you're faced with multivendor environments.

You need mass storage that can manage all that information on virtually every platform or network. You also need printers and plotters to display it.

All of our mass storage products, printers, and plotters are engineered to meet the quality, reliability, and performance standards you've come to expect from Hewlett-Packard. All are backed by technical support that's unmatched in the industry.

Internal Hard Disk Storage

HP offers a wide range of internal hard disk add-on options to increase your disk storage space. Use the ordering

charts below to help you select the storage device that is compatible with your workstation.

External Hard Disk Storage

Hewlett-Packard is continuing its commitment to the design and manufacture of world class storage solutions to meet the needs of our HP workstation customers. The HP Series 6000 mass storage product family offers several mass storage solutions in a variety of expandable packages. You can find solutions to your unique mass storage needs among the numerous compact systems offered.

The HP Series 6000 models have been designed with performance and reliability in mind. These mass storage

systems have undergone extensive testing to ensure the performance and compatibility with HP workstations are optimal. Quick access to replaceable assemblies in these compact storage systems also optimizes productivity by alleviating servicing problems.

The chart below will help you determine which devices will work on your system, or the earliest operating system required, and the type of device interface.

Higher capacity, performance, and data protection than ever before NEW

With the introduction of HP's Series 6000 Models 1350SA and 420SA disk arrays, HP further expands and enhances its robust product line of mass storage devices for the Series 700 workstations and servers. These new differential SCSI-II disk arrays offer high capacity, performance, and data protection features never before available from HP.

With today's technology resulting in increased SPU performance, don't let your disk drive inhibit your performance. HP's Disk Arrays can increase transfer and transaction rate through data spreading techniques such as writing bytes of information to each disk drive in a parallel fashion and spreading out larger data blocks in parallel or multiple smaller data blocks independently to take advantage of overlapping of disk accesses.

The underlying concept of arrays is the theory that Redundant Arrays of Inexpensive Disks (RAIDs) offer a number of viable advantages over single disks. Models 1350SA and 420SA offer multiple modes of operation including: RAID 0, 0/1, 3, 5, and independent mode. Each array comes standard with a utility package that allows you to choose modes of operation and data protection features to configure a system that meets your needs to the fullest.

HP Disk Arrays for the Series 700

With HP's Disk Arrays you can increase the external mass storage capacity of the Model 720 and 730 to 57 gigabytes and potentially up to 228 gigabytes for the Model 750. In addition you now can increase your file size up to 2 gigabytes, a 48 percent increase over the file sizes of previous HP product offerings.

With the data protection features available on the disk arrays, information on a damaged disk can be rebuilt from the parity information stored on other disks. Using the Models 1350SA or 420SA with data protection almost

eliminates the risk of losing data when a disk is damaged, and substantially reduces time-consuming reloads.

Upgrade kits are available for each disk array to provide you the opportunity to increase storage capacity, achieve better performance, or to ensure you have a spare disk available.

Clearly with the increased storage capacities, data availability enhancements, and performance improvements, HP's new Disk Arrays are the better choice to meet your needs in data storage!

** Capacity is dependent on operating mode. RAID 0 and independent modes are shown. RAID 3 and 5 reduce capacity by approximately 20%, RAID 0/1 by 50%.

Optical disk drives for larger storage capacity

Hewlett-Packard offers a full line of multifunction optical (rewritable/worm) 5.25-inch products that open the storage spectrum from the single 650-MB drive to the 144-disk, 93.6-GB Library.

With HP's multifunction optical storage, you have automated, reliable, and immediate access to vast amounts of information, at a fraction of the cost per MB of hard disk storage.

The chart below will help you determine which devices will work on your system, or the earliest operating system required, and the type of device interface.

Digital Data and Magnetic Tape Storage

Digital Data Storage for high capacity unattended backup NEW

Introducing the HP Series 6400 Model 2000 and Model 2000DC Digital Audio Tape (DAT) drives to provide you maximum data integrity. Both products incorporate 3.5-inch form factor DAT technology with a SCSI-II interface and HP's DATIO backup software utility. In addition, the industry-standard Digital Data Storage (DDS) recording format provides compatibility with the

HP Series 6400 Model 1300H and 1300S DAT drives.

The Model 2000 provides 2 GB of unattended backup using a single 90 meter DDS cassette. The Model 2000DC uses data compression to provide 8 GB of unattended backup using a single DDS cassette.

Magnetic Tape Storage for efficient network backup

The speed of the tape drive and the capacity of the media should be well matched to your computer system. Hewlett-Packard offers a full range of products to match your current

system and improve productivity. Remember, whether you need archival storage, online data storage, data exchange, software distribution, or backup protection, HP has the right product.

The chart below will help you determine which devices will work on your system, or the earliest operating system required, and the type of device interface.

Advanced printing technologies

Hewlett-Packard offers you advanced printing technologies and multiple printer features that will allow you to match your needs with just the right printer. The monochrome HP LaserJet printers on the following chart have a variety of useful features. All of these printers give you 300 dpi resolution, 14 internal bitmapped fonts (20 in the HP DeskJet), envelope handling, and the flexibility to handle most media.

Specific printer features are noted on the chart below.

33459A HP LaserJet IIIP

HP-UX interface support: Serial supported on all Series 300, 400, and 700 models; parallel supported on all Series 400 and 700 models except 400dl; parallel supported on Models 375, 345, 380, 362 and 382 for select devices.

HP PaintJet Color Printer (3630A)

The HP PaintJet color printer offers high-quality color graphics printing for PCs and personal workstations. Using HP's InkJet Technology, it prints at 180 dots per inch and up to 16.8 million colors depending on your system software. The new ink formulations produce colors that are bolder and brighter than ever before. The compact, personal-sized HP PaintJet printer handles fanfold paper or manual feed of cut-sheet and overhead transparencies for more versatility in creating colorful reports or presentations. A choice of Centronics, RS-232-C Serial, or HB-IB interfaces is available.

HP PaintJet XL Color Printer (C1602A)

Faster than the HP PaintJet printer on graphics, the HP PaintJet XL color printer can meet the color output needs of a high-volume user or an entire workgroup. A typical letter-size page of graphics prints in just 1.5 minutes. The built-in paper tray automatically feeds up to 200 sheets of letter- or ledger-size paper and up to 70 sheets of letter-size transparency film. The optional HP-GL/2 cartridge includes a 2-Mbyte buffer and additional fonts.

Save money by sharing resources

Domain/OS connectivity kits provide networked access and sharing of PCs, printers, and HP-GL/2 plotters in a Domain/OS environment. The kits come with:

- Complete instructions on how to configure the spooler software and how to connect the HP peripheral printing device utilizing the built-in RS-232-C/Centronics port or add-on Centronics board

- CGM to HP-GL/2 filter software
- Domain/OS print/plot spooler supporting HP-GL/2 devices

The chart below is to help you to choose the best Connectivity Kit for your Domain Workstation needs.

** Supported on system. See page 81 for complete RS-232-C cable ordering information.*

HELPFUL HINT:

The serial kit for HP Plotter and PaintJet printers is designed primarily for HP DraftMaster SX, RX, and MX plotters. The HP 7600 Series and PaintJet XL printers will perform better when connected through the parallel port.

HP LaserJet printer Connectivity Kits

These kits connect Domain/OS workstations to HP LaserJet Series IID, IIP, III, IIIP, IIID, and IIISI printers. Kits provide raster support for X and GPR bitmaps (with X Window System and SR 10.3), X Window dumps from 1 to 8 planes, and HP-GL/2 support for PCL-5 devices. Version 2.0 now supports double-sided printing and paper tray selection on the LaserJet IIID and IIISI printers. In addition, on the LaserJet IIISI you can now switch between PCL and PostScript®. These kits provide the ideal connectivity solution for electronic publishing, CASE, and technical office applications. Requires Domain/OS SR 10.2 or later.

HP Plotter and PaintJet printer Connectivity Kits

Kits are designed for HP DraftMaster SX, RX and MX plotters; HP 7600 Series Models 250, 255, and 355 electrostatic plotters; and the HP PaintJet XL printer with HP-GL/2 cartridge. The HP PaintJet Kit provides raster support for X and GPR bitmaps (with X Window System and SR 10.3) and X Window dumps from 1 to 8 planes. All kits require Domain/OS SR 10.2 or later.

PostScript® Filter Software

Troff to PostScript translates UNIX®, device independent *TROFF* print commands into PostScript print commands. Available on 1/4" cartridge tape. Requires Domain/OS SR 10 or later.

Parallel Interface Kit

This interface kit for AT-based systems supports a Centronics parallel, Versatec Differential or Versatec TTL output port. Kit includes Centronics parallel cable, an AT bus controller board, and the software driver. Requires Domain SR 10 or later.

Versatec V.80 Plotter Interface Kit

Kit supports monochrome electrostatic Versatec plotters from "A to E" sizes. Requires Domain SR 10 or later.

Access Power and Exchange Information

The trend today is to have workstations performing the tasks traditionally reserved for corporate mainframes. To take full advantage of their power, workstations must be networked. They must communicate with other workstations and with PCs, minicomputers, and mainframe computers.

HP Apollo Workstation networking is based on industry standards and the client/server model. It supports TCP/IP-based networking over Ethernet/IEEE 802.3 as well as FDDI, X.25, and Token Ring. The application layer allows your workstation to talk to a variety of systems using ARPA/Berkeley Services, NFS[®], LAN

Manager X, NetWare, NCS, SNA 3270 and X.400.

Transparently using or providing server resources anywhere on the network can put your HP Apollo Workstation in its most powerful position.

Connections for the Series 700

The Series 700 workstations have both a BNC "T" connector and an AUI connector built-in. The BNC "T" connector is the standard active default allowing for instant connection to a ThinLAN or Thin-Coax cable. If you prefer to connect to an

external transceiver such as ThickMAU (Thick-Coax) or EtherTwist MAU (10Base-T), you can activate the AUI connector rather than the BNC "T" connector by selecting factory option #AL9 when ordering your workstation.

Ordering Information

Description	Product Number	Price
EISA/LAN 9000 Provides second Ethernet LAN. Includes LAN interface card, built-in ThinMAU, and BNC "T" connector.	25567A	\$1,395
Options: Replace built-in ThinMAU and BNC "T" connector with AUI connector, ThickMAU transceiver, tap, and 1-meter AUI cable.	#740	395
Replace built-in ThinMAU and BNC "T" connector with AUI connector, EtherTwist MAU (10Base-T) transceiver, and 1 meter AUI cable.	#840	195
EISA/FDDI (Series 700 only) The FDDI interface comes with a single attach station (SAS) connection. The interface is fully compliant with ISO 9314 standard. Includes interface card, driver software on 4mm DAT, license to use, and installation documentation.	J2156A	4,495
Options: Delete software right-to-use and documentation.	#1AW	(\$995)
Software on 1/4" cartridge tape and documentation.	#AAH	195

Series 700 Communication Interfaces

Communication interfaces are interface cards and accessories that allow Series 700 workstations to communicate with peripherals, serial devices, and other non-LAN devices.

Ordering Information

Description	Product Number	Price
EISA SCSI II Host Adapter Connects SCSI II fast/differential devices through EISA slot. [1] Includes terminator (Product # 12016-80003)	25525A	\$1,195
EISA HP-IB Host Adapter Connects HP-IB (IEEE 488) peripherals through the standard-speed EISA slot.	25660A	1,195

[1] Model 720 requires an add-on EISA.

Connections for the Series 400

The Series 400 workstations have both a BNC "T" connector and an AUI connector built-in. The BNC "T" connector is the standard active default allowing for instant connection to a ThinLAN or Thin-Coax cable. If you prefer to connect to an external transceiver such as ThickMAU (Thick-Coax) or EtherTwist MAU (10Base-T), you can activate the AUI connector rather than the BNC "T" connector by

selecting factory option #AL9 when ordering your workstation. The 400e, 400t, and the 425t support only the built-in LAN connectors, however, a second Ethernet connection can be added to the 400s, 425s, and 433s with a DIO-I/O LAN 9000 interface card. If you would like additional information, please call our technical support engineers at 800-637-7740.

Networking

HELPFUL HINT

The 400s, 425s, and 433s come standard with an HP-IB interface and a DIO-II slot. In order to add a second or third HP-IB interface, you must order the A1401A to convert the DIO-II slot to an DIO-I/O slot. See page 48 for product information.

Series 400 Communication Interface

Communication interfaces are interface cards and accessories that allow Series 400 workstation to

communicate with peripherals, serial devices, and other non-LAN devices.

Ordering Information

Description	Product Number	Price
HP-IB Interface Standard speed IEEE-488 interface kit for the 400t and 425t. (HP-UX only)	A1450A	\$400

Series 300 and 4XXs Communication Interfaces (DIO-I/O)

Communication interfaces are interface cards and accessories that allow the Series 300 and 4XXs to

communicate with peripherals, serial devices, and other non-LAN devices.

Ordering Information

Description	Product Number	Price
GPIO Interface Provides a flexible parallel interface that will send and receive up to 16 bits of data to a variety of devices. Option: Add 4.6M unterminated cable.	98622A #001	\$425 111
HP-IB Interface Standard-speed IEEE-488 interface card. High-speed disk interface to transfer data in bursts at a rate of 2 MB/second in word mode.	98624A 98625B	\$365 1,000
RS-232-C (Serial) Interface Provides simple asynchronous I/O communication with switchable settings. Options: DTE (male) RS-232-C cable DCE (female RS-232-C cable Provides simple asynchronous interface; DTE-25F connector, no cable. No switchable settings.	98626A #001 #002 98644A	\$415 83 83 212
Datacomm Interface Provides asynchronous serial communications; including RS-232-C, RS-449, and RS-423. Options: DTE (male) RS-232-C cable DCE (female) RS-232-C cable DCE (female) RS-449/423 cable	98628A #001 #002 #003	\$540 96 96 196
SCSI Peripheral Host Adapter Provides SCSI connectivity for SCSI peripherals. Includes DIO-I/O card, and 1-m cable (female, low-density bail-lock).	98658A	\$1,000

Series 300 and 4XX Communication Interfaces *(Continued)*

8-Channel Asynchronous Multiplexer (DIO-II)

Provides eight asynchronous RS-232-C compatible ports with full duplex modem control. Programmable data rates are available for each channel up to 19.2 K baud. Includes DIO-II interface card, RS-232-C patch panel, 2.5-meter card/panel interconnect cable, and software for loopback test utility when using HP-UX 6.2 or 7.0.

Telebit T2500 Modem

The Telebit T2500 is the fastest dial-up modem that is completely compatible with HP-UX workstations. It offers full asynchronous and synchronous compatibility with dial-up V.32 and PEP modems.

Using the PEP data communications protocol, the modem can transmit or receive asynchronous data at speeds of up to 18,000 bps over dial-up telephone lines, or up to 19,200 bps with lempel-ziv data compression.

When in PEP mode, the modem provides integrated support for UNIX[®] UUCP file transfer protocol, achieving throughputs faster than other asynchronous dial-up modems.

The T2500 maximizes throughput by allowing minimal data fallback rate of less than 100 bps while other modems drop back from 9600 to 4800 bps in one step. PEP modulation allows the T2500 to maintain connections where conventional modems fail. If you need to configure and test remote modems from a central site, the T2500's remote configuration and management capability will save you the expense of onsite technicians.

Supported on the following HP hardware:

- HP 9000 Series 600, 700, and 800
- P/N 98642A 4-Port Multiplexer
- P/N 98638 8-Channel Multiplexer
- P/N K2292A One-to-Three RS-232-C splitter
- Built-in RS-232-C ports on Series 700 workstations

370 or compatible mainframe using SNA 3270 protocols. To access an IBM mainframe from a single Series 400 workstation, the SNA Link

4-Port RS-232-C Multiplexer

Provides three RJ-11 asynchronous RS-232-C ports for local or direct connect, and a 25-pin port for local RS-232-C or modem connection. Includes DIO-I/O interface card, three RJ-11 to 25-PIN (male) converters, one 5-meter 25-pin male modem cable, and three 15-meter RJ-11 cables.

DIO-I/O X.25 9000 Interface

X.25/9000 Link

The X.25/9000 Link hardware and software lets you connect from an HP 9000 Series 300 or 400 to private and public X.25 networks. With this link, you get communication from HP 9000s to HP 9000 and other systems. Complies with 1980 and 1984 CCITT recommendations for X.25. Supports ARPA/Berkeley Services, TCP/IP, programmatic user access to X.25 packet layer 3, PAD emulation for incoming and outgoing access (X.3 and X.29), and OSI services.

product is required. To access an IBM mainframe from multiple HP 9000s on a LAN, the Gateway (GW/SNA Link) product is required. For assistance in configuring your HP-UX workstation in an IBM environment call our technical support engineers at 800-637-7740 ext. W221.

IBM Connectivity

HP-UX SNA Link and HP-UX Gateway (GW/SNA Link) provide communications between an HP 9000 Series 300 or 400 workstation and an IBM system

Apollo Domain Networking Products

Apollo Domain networking offers a wide range of network solutions. Domain workstations and servers run on four networking architectures; 10 M bps Ethernet/IEEE 802.3, 12 M bps Apollo Token Ring, 4 M bps IBM Token Ring and X.25 Packet-Switch (WAN). Domain supports TCP/IP over Ethernet along with application layer products such as ARPA/Berkeley Services, NFS, SNA3270, NFS, Telnet, and Task Broker.

Ordering Information

Networking

Connections for the Series 400 and DN Series

To expand the LAN connectivity capabilities of your Domain workstation, you may add an Apollo Token Ring, Ethernet, or IBM Token Ring interface. Up to five add-on LAN

cards can be installed on DN3XXX and DN4XXX workstations. Only one LAN card can be installed on DN2XXX workstations.

Series 400 and Domain Communication Interfaces

Communication interfaces are interface cards and accessories that allow Domain DN3XXX or DN4XXX

and Series 4XXs workstation nodes to communicate within non-LAN environments.

SCAT—Serial AT Communications Controller

This is an intelligent communications controller that mounts in a DN3XXX or DN4XXX or Series 4XXs node. It provides two high-speed serial ports for SNA or X.25 communications. It supports one to three physical

interfaces (RS232, RS422, V.35) for each port. The controller includes two interface cables which must be specified as part of the product number. The software portion of the product is available only on cartridge tape.

Ordering Information

Description	Product Number	Price
SCAT—Serial AT Communications Controller Physical interface choices: Select (2) sets of two character codes to replace x's in product number. CABLE: RS-232-C RS-422 V.35 none Example: For SCAT board with RS-232-C and V.35 cables, order SCAT10R2V-D.	SCAT10XXXXD R2 R4 V- N-	\$2,520
Domain/DFL-100 Fiber Optics Line Extends a single Apollo Token Ring network between buildings by using fiber optic cable. Must have one DFL-100 unit per building to form a complete link.	COM-DFL	1,210
Domain/DFL-100-R Redundant Fiber Optics Link Used as a backup if the DFL-100s become inoperable while in operation. Also contains a connector cable to connect to a primary Domain/DFL link.	COM-DFL-R	1,265

AST-5 Ethernet/IEEE 802.3 Transceiver w/LANVIEW™

The AST-5 incorporates LANVIEW, the built-in diagnostic tool that helps you solve many hard-to-find network problems. It comes with a non-intrusive cable tap that attaches to the

backbone without bringing down an active network. If you prefer, a BNC tap is available, facilitating the addition of nodes to a thin-net segment for attachment of Ethernet

controllers with no onboard transceivers (commonly used in PC-type LAN applications and in DECconnect™).

802.3 Ethernet Transceiver

This transceiver offers you quick and easy attachment to Ethernet 10Mbps Baseband LANs. Meets the requirements of Ethernet/IEEE 802.3 and Ethernet 1.0/2.0 specifications, providing heartbeat, jabber, halfstep signaling, and 2KV isolation voltage.

TMS-3 Ethernet Transceiver

Complete your PC LAN with the TMS-3 transceiver. Designed specifically to complement your Ethernet cabling application, the TMS-3 is an inexpensive, lightweight unit that can be installed easily, even in tight spaces. The TMS-3 provides you with LED indicators for both power and SQE (heartbeat) test. You can even select the enabling or disabling of the test without disassembling any portion of the enclosure.

Network Integrity—Plug-In Convenience

Networking

DQC Outlet

The DQC outlet installs in minutes to HP Apollo specified coaxial cable using a cable stripper (K1521 see below), and two screwdrivers (one flat, one Philips head). It can be surface mounted or in-wall mounted using standard electrical mounting hardware, or even left free-standing in the housing provided.

DQC Systems

With the DQC Quick Connect System, a workstation can be added to or removed from your network without interrupting the network or normal workflow. DQC systems provide make-before-break connections for HP Apollo Domain/OS workstations and servers to your Domain/OS System token ring. In order to obtain a complete DQC system, please order the Domain Quick Connect Outlet and one of four Domain Quick Connect cables. DQC cables are available in either 10- or 25-foot lengths, terminated with either D-subminiature connectors or BNC connectors to match your particular workstation requirements.

DQC Outlet

Ordering Information

Description	Product Number	Price
Domain Connect		
DQC Outlet	K1048	\$69
DQC Systems		
10' DQC to BNC cable	K1049	\$58
25' DQC to BNC cable	K1050	89
10' DQC to D-Sub cable	K1069	79
25' DQC to D-Sub cable	K2293	129

BNC to D-Subminiature Cable

This 18" cable mates a D-subminiature connector with dual BNC connectors.

Domain Network Switch

The Domain Network Switch helps to create an efficient multiloop network to facilitate nondisruptive troubleshooting. You can switch out problem subloops while maintaining continuous data flows in the rest of the network.

Ordering Information

Description	Product Number	Price
BNC to D-Subminiature cable	K1503	\$75
Domain Network Switch	K1522	185

Multiple DQC Connectors

Now you can add or remove up to six workstations from your Domain network without interrupting normal workflow or workstations elsewhere in the network. DQC Cluster connectors, available in both 4- and 6-outlet units, provide make-before-break connections for workstations and Apollo token ring servers.

Connect as standard DQC outlets and cascade for additional utility within the network. The aluminum backplate includes pre-drilled holes for mounting to a wall or other surface. Both the 4- and 6-outlet units are pre-wired with a DQC cable for connection to your current DQC network.

Other features include: a cable strain relief and accessible BNC connectors for creating a self-contained loop.

Crimping Tool

This useful crimping tool provides a solid connection every time. Ratchet action automatically prevents release until cycle is complete. Features rugged, professional construction and safety handles.

BNC Connector Wrench

This 7/16" open-end wrench with thin design easily accommodates wrench flats on BNC solder-on connectors; can also be used on Teflon-jacketed cables.

NOTE: Order in multiples of two.

Cable Stripper

Cable strippers are available with dual blade cassette for wrench connectors or triple blade cassette for crimp connectors and DQC outlet installations. These handy strippers automatically remove both the cable jacket and dielectric for fast, perfect cable preparation. Blade cassettes are also available separately.

We always try to make ordering from HP Apollo DIRECT as convenient as possible. If you promise to keep telling us how we can help you, we promise to listen.

SUPPLIES AND ACCESSORIES

Maximize your productivity and performance

HP supplies and accessories are tested to HP high-quality specifications and testing is continued throughout the life of the product to ensure that you always get the best possible performance from your HP workstation and peripherals.

Use HP's data storage supplies and accessories to optimize the reliability and performance of your HP storage devices. To protect your HP workstation and ensure access to the data you need, specify HP power systems, surge suppressors, and cables. And to organize your work area, HP *Design Plus* furniture is designed in concert

with your workstation equipment and peripherals to be compatible and give you optimum layout of your equipment.

Choose HP supplies and accessories for the compatible, quality performance you demand from your HP workstation.

HP High-Density Cartridges

Get the extra reliability of our exclusive double certification! Each cartridge meets HP's unyielding quality control standards, which means 100 percent of the data area is defect-free. All marginally defective data blocks are electronically removed so there's no danger of even a worn or poorly maintained drive writing to an "iffy" block and causing readback problems.

And because they're already certified, you save from 15 to 75 minutes per tape. They're formatted into 1-KB user data blocks and are ideal for data exchange among HP systems, software distribution, and data/transaction logging. Use with HP 7908/11/12/14, 9144A, 7942A, 7946A, and 35401A tape drives.

Double certification means no readback problems!

Ordering Information

Description	Product Number	Price
67-MB (pre-formatted and certified) 600-ft. Tape cartridge. Five per box	88140LC	\$219/box
16-MB (pre-formatted and certified) 150-ft. Data cartridge. Five per box.	88140SC	169/box

HP Data Cartridges for HP 9145A Drives

Trust your valuable data to these cartridges, engineered and tested expressly for the HP 9145A drive.

32-MB (pre-formatted and certified) Data cartridge. Five per box.	92245S	189/box

HP Brand Magnetic Tape

Thanks to extensive testing, you can rely on HP Brand magnetic tape to more than just "match" your HP drive. It actually optimizes drive performance, by eliminating "skip and rewrite" problems that inferior tape can cause.

HP tape is inspected over every inch to assure that it's totally error-free, certified end-to-end for use through 6250 characters per inch, and warranted against defects for five years.

Out of 26 tapes tested on the same HP drive for 220 full reel passes, only one tape passed all tests for wear, environmental and magnetic properties, signal quality, cleanliness, and durability with flying colors...HP Brand magnetic tape!

Our tapes are tested to assure optimum performance

Optical Disks/DDS Cassettes

Supplies and Accessories

HP Optical Disks

Get more reliability, performance, and longevity from your HP Optical Drive investment by selecting the disk developed with your drive in mind. Use HP Rewritable Optical Disks for disk-to-disk compatibility—the key to secure protection of your valuable data. These are the only disks tested with the HP Optical Drive (under worst-case conditions) to meet ANSI and ISO standards. Guaranteed to be 100 percent error-free. Full-year warranty. Each 5.25-inch, double-sided HP Optical Rewritable disk gives you 650 MB of removable capacity for a fraction of hard disk storage costs. You'll also save time—up to 40 minutes per disk—since these rewritable disks are pre-formatted.

HP Optical Disks go beyond compatibility.

Digital Data Storage Cassettes

Developed specifically for computer applications and tested to withstand multiple passes, HP's DDS cassettes meet your most demanding high-capacity storage needs. Whether you're backing up an HP commercial **NEW** system or technical workstation on an HP DDS tape drive, HP DDS cassettes have the space to get the job done. Since DDS cassettes offer true high-capacity storage (1.3 GB on 60 meter tapes and 2 GB on 90 meter) without data compression, you can backup large quantities of data unattended. Engineered to exacting standards required for DDS-format tapes and compatible with HP DDS tape drives, HP DDS cassettes are the ones to trust for your critical backup needs. Five per box.

Description	Product Number	Price
DDS Cassette Storage Box		
Secure your HP DDS cassettes in this large capacity, lockable storage box. Holds 12 cassettes and is designed for both desktop or hanging file cabinet use. File cabinet adapter included. (U.S. & Euro sizes)	92283L	\$39
DDS Cleaning Cassette		
Prevent data integrity problems with HP's DDS (DAT) cleaning cassettes. Designed to reduce the risk of dirt-related tape head clogs and scratches. A must for proper cassette maintenance! (Box of 2)	92283K	\$26
Data Cartridge Tray		
Keep your 88140LC/SC and 92242L/S data cartridges safe and organized in this handsome storage tray. Features a key-locking, removable lid which nests under the base when not in use. Constructed of durable high-impact plastic with transparent antistatic acrylic lid. Cream-colored base with molded slots holds up to 10 data cartridges securely in place.	92167F	\$45
Cleaning Supplies		
Video Screen Cleaning Kit. Clean your CRT terminal screens and other glass surfaces with HP's Video Screen Cleaning Solution. Kit contains two 4-ounce bottles of solution with easy-pour dispensing cap, plus fifty 3 x 5 in. lint-free wipes.	92193V	\$17
HP Cleaning Cartridge Kit. Cleaning the heads on your HP 9144, 9145, 9142A, and 35401A 1/4" tape drives is as easy as inserting a media cartridge. Our kit includes a cleaning cartridge, a supply of alcohol-based cleaning solution, 13 foam pads, plastic tweezers, a cleaning maintenance record, plus instructions for each type of drive.	92281C	45
Replenish Kit with a fresh supply of alcohol-based cleaning fluid, 24 foam pads, tweezers, and a new maintenance record. There's no need to replace the cleaning cartridge from the original kit.	92281D	13

Polaroid Anti-Radiation Glare Screen for 19" - 21" Monitors

The Polaroid CP-Workstation Filter is designed to provide superior contrast enhancement and glare reduction for 19"-21" computer monitors by utilizing circular polarizing technology. This high-quality filter is made of glass with a circular polarizer that contains a transparent conductive coating which reduces electromagnetic radiation. It also reduces electromagnetic interference. This same transparent conductive coating also provides static control grounding to reduce the chance of lost data due to static electricity.

The CP-Workstation Filter comes in one size that will fit most 19" - 21" monitors thanks to a unique mounting system. The filter is an ideal solution to reducing glare for CAD/CAM, desktop publishing and other applications requiring intense visual concentration.

Design Plus Workstation Furniture

Supplies and Accessories

CAD Workstation lets you stretch out and design in comfort

Our spacious CAD Workstation lets you extend your work area instantly with a 36-inch pull-out surface, and tuck your keyboard away when it's not in use.

The Corner Turn and Medium System Table offer space for reviewing reference materials. The Mobile Mini-Rack offers extra work surface *plus* off-table storage for CPUs and mass storage.

Get our Ergonomic Task Lamp for non-glare light that's easy on your eyes, and our Drawing Holder to hold "C" and "D" size drawings at eye-level.

Medium System Table..... 92214B
Task Lamp 92213Q
Corner Turn 92214J
CAD Workstation..... 92213F
"C" and "D" Size Drawing
Holder 92213D
Mini-Rack 92211R
(Refer to page 75 for filler panels and
drawers for 92211R)
Mobile Drawer Unit 92211N

CAD Corner handles jumbo monitors and expansive drawings

Our CAD Corner Workstation supports oversized monitors, and fits perfectly between a Medium System Table and Mobile Mini-Rack System Cabinets.

Mini-Racks and Drawer Units keep peripherals and files within easy reach while offering tabletop space, as do the Corner Turn and Mobile Support Table.

Illuminate it all with the cool, non-glare light of our *Design Plus* Ergonomic Task Lamp. The result? A U-shaped configuration that optimizes CAD ease and efficiency.

This configuration incorporates:

Large System Table 92214C
Corner Turn 92214J
Task Lamp 92213Q
Medium System Table..... 92214B
CAD Corner Workstation 92214K
Mini-Rack 92211R
(Two units—refer to page 75 for filler
panels and drawers for the 92211R)
Mobile Drawer Unit 92211N

Power Backup and Distribution Products

Supplies and Accessories

Deltec's 2000 Series Uninterruptible Power Systems for HP Workstations

Deltec's 2000 Series offers a cost-effective and reliable solution to power problems which can damage your workstation and other equipment. With the 2000 Series, you'll get a constant flow of refined, regulated, computer-grade power through virtually any utility line disturbance. Not only will it protect your hardware and data from blackouts, brown-outs, surges, and spikes, but it offers the added benefit of reduced service costs resulting from running your workstation on "clean" power.

Deltec 2000 Series UPSs have low input current distortion, isolated output voltages for noise protection, high overload capability, remote emergency power-off, and an RS-232 interface for remote monitoring and shutdown.

They both feature power monitoring and shutdown software for HP-UX, 1/4" tape, 25-pin/25-pin cable, 8-receptacle output panel. Includes Automatic Transfer Switch and ball casters.

Hardware supported:
HP 9000 Series 400s, 700s, and 800s.

Technical specs:

Input voltage: 120 Vac/60 Hz

Input plugs:

- L5-30P for 2.4 kVA UPS
- 5-50P for 3.6 kVA UPS

Output voltage: 120 Vac/60 Hz

Output connections: 8 receptacles (5-15R)
and one L14-30 receptacle

Battery backup time: 10 minutes at full load with 0.8PF, standard internal battery pack.

Deltec's 2000 Series provides the protection your equipment deserves.

Surge Suppressors from HP

The reliable three-stage circuitry in HP Surge Protectors detect and dissipate dangerous electric surges on your power line before they become a problem to your workstation. All three models feature a resettable circuit

breaker and EMI/RFI noise filtering. A circuit integrity lamp indicates that the protection circuit is functional. When the lamp is out, the unit should be replaced, although unprotected power is usually still supplied.

SCSI Interfaces

SCSI interfaces are single-ended connections capable of synchronous and asynchronous operation in the HP-UX and Domain/OS environment. Models 340, 345, 360, 370, 375, 380,

and all Series 400 and 700 offer a factory option for SCSI. For Model 340, there is a separate SCSI interface kit which must be installed by an HP customer engineer. For Series 3XX,

4XX, and 7XX, there are additional SCSI boards that fit into either DIO, DIO-II or PC-AT slots.

 Match intersecting systems and select cable and terminator shown in white area.

 CONFIGURATION NOT SUPPORTED
Fast differential SCSI-II will not work with normal (single-ended) SCSI-II.
HP-UX only supports one of each removable disk-type mechanisms per system, two tape-type mechanisms per system.

* Model 2000 and 2000 DC DDS standalone devices include SCSI cable and terminator to attach directly to Series 700 SCSI port. To daisy-chain to another SCSI peripheral, order appropriate cable (92222A/B/C).

Note: Take care not to exceed 7 SCSI-II devices when connecting expansion systems on each SCSI-II Bus. Order only one terminator per chain.

Differential SCSI Extender Cables

Extend your current differential SCSI cable length up to 25 meters with HP's extender cables. The connectors are male low-density bail-lock to female

low-density bail-lock. Recommended for the HP 25525A EISA Card (Series 700 only).

Ordering Information

Description	Product Number	Price
3-m (10-ft) cable	C2900A	\$100
5-m (16.4-ft) cable	C2901A	110

HELPFUL HINT:

SCSI DOs and DON'Ts for Domain/OS

- Only HP Apollo-approved SCSI cables should be used with the Series 400 and any connected SCSI devices. Always use the shortest possible cable(s) for your configuration.
- If the Series 400 system has internal disk drives, you must count them as SCSI devices.
- A maximum of one HP Apollo .25-inch cartridge tape drive is allowed per system.
- A maximum of one HP Apollo flexible disk drive is allowed per system.
- Although a system can have up to seven disk drives (Winchester and magneto-optical), there is a limit of five mounted disk volumes per system at any one time.
- A maximum of two 8mm tape drives are allowed per system.
- When adding third-party SCSI devices, total cable length external to the Series 400 unit (both external cables and cables internal to the devices) should be limited to 4.6 meters (15.1 feet).

Fiber Optic Cable

HP Apollo DIRECT has the fiber optic cable you need. Fiber optic cable delivers wide information bandwidth with very low propagation loss, and provides your network with immunity from electromagnetic and radio frequency interference. It also gives complete electrical isolation and excellent abrasion resistance and flexibility. Choose from a variety of sizes. The 30-foot to 250-foot lengths are available in both PVC and Teflon™.

Ethernet/IEEE 802.3 Backbone Cable

Available in both PVC and Teflon™ jacket, this backbone cable is ideally suited to meet all your Ethernet transmission needs. The Teflonjacketed cable is UL approved for safe use in environmental air spaces without a conduit. PVC jacketed cable must be enclosed in conduit or restricted to use in open air spaces, such as offices or manufacturing floors. Both cables are available in four lengths: 230', 383', and 1000' spools. All cables are conveniently marked at 2.5 meter (8.2 feet) intervals, the minimum allowable distance between physical taps. Meets CL2 and CL2P N.E.C. standards.

Thin Ethernet/IEEE 802.3 Coaxial Cable

Thin Ethernet cable provides a simple, inexpensive, flexible method for connecting DN3000 to Ethernet (via multiport repeater). It's available with Teflon jacket in four pre-cut lengths (5, 10, 20, and 50 meters), and on 1000' spools and with PVC jacket in 50 meter lengths. Meets CL2 and CL2P N.E.C. standards.

At HP Apollo DIRECT, we understand the importance of accurate information.

Whether you need product compatibility or prices, we work hard to get you the answers you need.

Coaxial Cables

Supplies and Accessories

Single Coaxial Cable with Teflon Jacket

Teflon eliminates the need for conduit and cuts installation costs. Meets HP Apollo specifications of 1km of clear signal performance. Made with a special flame-resistant, smoke-retardant insulation compound, this cable is UL-approved as meeting national Electrical Code 725-B. A higher temperature rating than PVC-jacketed cables eliminates the need for conduit in air plenums. Also meets CL2 and CL2P N.E.C. standards.

Single Coaxial Cable with PVC Jacket

Combine high performance and low cost with our PVC-jacketed cable. Meets HP Apollo engineering specifications of up to 1km of clear electrical signal performance. Features Duofoil™ construction with more than 61 percent tinned copper braid and black PVC jacket. Provides 100 percent shielded coverage and is UL-approved to meet all flammability standards. Also meets CL2 and CL2P N.E.C. standards.

Trademarks and Credits

Domain is based and is compatible with USL's UNIX operating system. It also complies with SVID2 interface specifications.

HP-UX is based on and is compatible with the UNIX operating system and complies with X/Open's, XPG3, POSIX 1003.01 and SVID2 interface specifications.

Intel is a US trademark of Intel Corporation.

Lotus 1-2-3 are US registered trademarks of Lotus Development Corporation.

MS-DOS is a US registered trademark of Microsoft Corporation.

OSF/1, OSF/Motif, Motif, and Open Software Foundation are trademarks of the Open Software Foundation in the US and other countries.

PostScript is a registered trademark of Adobe Systems, Inc. in the US and other countries.

SoftPC is a registered trademark of Insignia Solutions, Ltd. in USA and other countries.

UNIX is a registered trademark of UNIX System Laboratories Inc. in the USA and other countries.

HP Apollo DIRECT

Pricing

Prices in this document are for reference only and are subject to change without notice. The pricing list is in U.S. dollars and represent Continental U.S pricing.

Freight

Prices include standard ground transportation. Special shipping is billed at the customer's expense.

Discounts

All products in this catalog are eligible for the same standard volume discount schedules used through your HP sales representative. Additionally, standard HP terms and conditions apply. For copies of the standard terms and conditions, call 800-637-7740.

Delivery

Orders will be scheduled at standard manufacturing lead times.

Purchase Orders

For orders greater than \$10,000, a hard copy purchase order is required. For software orders, customers with signed current HP volume purchase agreements may order software licenses directly. Customers not having an HP purchase agreement must submit a hard copy of a purchase order, sign the software terms and conditions, and submit it with the order. Confirming purchase orders for other phone orders are requested.

CPU Upgrade Returns ONLY

To return CPU upgrade material and get credit for material returned, follow these steps:

1. Call 603-772-1500 x3641 for upgrade equipment return authorization.
2. Mail CPU equipment to:
Hewlett-Packard Co.
Attn: Asset Management
Department
200 Domain Drive
Exeter, NH 03833
3. Make sure the Upgrade Equipment Return Authorization number is marked clearly on the box and in the packing material.

All Other Returns

Call 800-637-7740 for return instructions. Our HP Apollo DIRECT sales consultants will make sure your problem is resolved promptly. If you ordered through your local HP sales office, please contact that office. Customer installable software may only be returned under warranty or if it is sealed and unused. Operations manual and other documentation may not be returned for credit. For items returned for your convenience or due to your error, there is a restocking fee. There may also be a refurbishment charge for hardware products.

Billing Questions

If you ordered through HP Apollo DIRECT and have a question regarding your invoice, please call 800-637-7740, and an HP telemarketing representative will assist you. If you ordered through your local HP sales office, please contact that office.

Shipping Damages

If items are damaged in transit, simply follow the instructions below:

- If a shipment is visibly damaged on arrival, do not accept it until the person making the delivery has endorsed the bill of lading with a statement for the extent of damage.
- If any damage is found after unpacking, retain all cartons and inner packaging at the shipment location and immediately request that the carrier arrange for an inspection.
- Notify HP Apollo DIRECT immediately of the damaged shipment in order for us to make the proper sales adjustment and/or provide you with return instructions. Please provide us with the sales order number, product number, and quantity damaged.
- If instructed to return the damaged product to HP, please include copies of the bill of lading (with the carrier's statement of damage), return authorization number on packing material, and the inspection report.

Catalog Errors

HP reserves the right to correct printing errors and change prices. Only HP corporate price list prices, as listed at the time your credit-approved order is placed, are applicable.

Warranty

As an expression of confidence that our products will continue to meet the high standards of reliability and performance that our customers expect, Hewlett-Packard products carry the following warranty:

HP software and firmware products which are designated by HP for use with a hardware product, when properly installed on that hardware product, are warranted not to fail to execute their programming instructions due to defects in materials and workmanship. If HP receives notice of such defects during the warranty period, HP shall repair or replace software media and firmware which do not execute their programming instructions due to such defects. HP does not warrant that the operation of the software, firmware, or hardware shall be uninterrupted or error free.

HP hardware products listed in this catalog are warranted against defects in materials and workmanship. If HP receives notice of such defects during the warranty period, HP shall, at its option, either repair or replace hardware products which prove to be defective.

If HP is unable, within a reasonable time, to repair or replace any product to a condition as warranted, Buyer shall be entitled to a refund of the purchase price upon return of the product to HP.

Terms and Conditions

Duration and Commencement of Warranty Period: The warranty period for each product begins either on the date of shipment or, where the purchase price includes installation by HP, on the date of installation. If Buyer schedules or delays installation more than thirty (30) days after delivery, the warranty period begins on the thirty-first (31st) day from the date of shipment.

Place of Performance: Within HP service travel areas, warranty and installation services for products installed by HP and certain other products designated by HP will be performed at Buyer's facility at no charge. Outside HP's service travel areas, warranty and installation services will be performed at Buyer's facility only upon HP's prior agreement and Buyer shall pay HP's round trip travel expenses and applicable additional expenses for such services.

Onsite warranty services are provided only at the initial installation point. If products eligible for onsite warranty and installation services are moved from the installation point, the warranty will remain in effect only if Buyer purchases additional inspection or installation services at the new site.

For product warranties requiring return to HP, products must be returned to a service facility designated by HP. Buyer shall prepay shipping charges (and shall pay all duties and taxes) for products returned to HP for warranty service. Except for products returned to Buyer from another country, HP shall pay for return of products to Buyer.

Limitation of Warranty: The foregoing warranty shall not apply to defects resulting from:

1. Improper or inadequate maintenance by Buyer;
2. Buyer-supplied software or interfacing;
3. Unauthorized modification or misuse;
4. Operation outside of the environmental specifications of the product; or
5. Improper site preparation and maintenance.

The warranty set forth above is exclusive and no other warranty, whether written or oral, is expressed or implied. HP specifically disclaims the implied warranties of merchantability and fitness for a particular purpose.

Exclusive Remedies: The remedies provided herein are Buyer's sole and exclusive remedies. In no event shall HP be liable for direct, indirect, special, incidental, or consequential damages (including loss of profits) whether based on contract, tort, or any other legal theory.

This warranty gives you specific legal rights, and you may also have other rights which vary from state to state, province to province, or country to country.

Customers ordering HP development software (HP-UX or Domain/OS) must adhere to HP's software license terms. Third-party software is subject to the terms and conditions of the vendor.

For copies of the standard terms and conditions or software terms, call 800-637-7740.

More catalogs from HP DIRECT

They're easy to get... just mark your choices on the business reply card attached to this catalog!

MPE and UNIX Computer Systems and Servers

This new HP DIRECT catalog will be published in May 1992. It features hardware, software, peripherals, upgrades, add-on products and accessories to complete your multiuser systems.

Test and Measurement

A broad selection of basic test and measurement instruments, accessories and test software are featured, all available with off-the-shelf shipment.

Remanufactured Computer Equipment

If you have cost constraints and don't need the very latest technology, consider HP's remanufactured systems, peripherals and accessories.

Education

HP courses on networking, UNIX software development, OSF technology and open systems are described in this comprehensive catalog.

Introducing InterWorks

A new user group for HP-UX and Domain/OS Workstation users

InterWorks, the international HP Workstation Users Group, is an independent, not-for-profit user group, dedicated to developing and providing

forums for sharing and exchanging technical information, directions and experiences. Membership in InterWorks is free to anyone who works

with HP workstations. If you would like more information on becoming a member, please call (508) 256-6600.

You don't have to move mountains to get these stones.

All it takes is a phone call...

to get workstation X Window performance at X terminal prices. Look at page 16 of this catalog to find the information you need to order these powerful, RISC-based X stations.

Then just give us a call — we'll do the rest. And should you need technical assistance, we'll put you right through to a technical support engineer, pronto.

Get what you need from the number 1 world-wide vendor of color X terminals. For a price that won't leave you between a rock and a hard place.

Call 800-637-7740
ask for operator W221

**Let us make it easy for you
to order HP X stations.**

We have an easy way for you to get
the products most analysts
only get to review...

Industry Information for the UNIX Workstation User

VOLUME 3 NO. 2 \$2.95

February 1992

A REAL CHARMER

HP's new Snake outperforms models that cost twice as much.

By the WN Staff

Hewlett-Packard Co. has reinforced its claim as leader in the workstation price-performance race by entering a strong contender in the low-cost workstation arena.

HP added

"HP's OpenView will Eclipse Sun's SunNet Manager, and all other network management entities over the next few years."

Frank Dzubeck
Communications Network Architects
Communications Week - Oct. 28, 1991

HP Apollo 9000 Model 710 performs well for the price.

The Bottom Line

With the introduction of the 700/RX, HP is bringing to the X-terminal market a new family of products that definitely outdoes the competition — packing more power for a more reasonable price.

Real Charmer

Continued from Page 1

mark tests. In comparing the color workstations with 16Mb of RAM, the Indigo is priced at \$12,500 with a 400Mb drive, and the 710's price is \$13,990 with a 420Mb drive. But based on HP's performance ratings, the Indigo offers 4.2 MFLOPS to the 710's 13.3 MFLOPS. The 710's 26.5 MFLOPS

ously had no workstations in Sun Microsystems Inc.'s Digital

When the 710 is teamed up which was introduced last spring

figuration with 16-inch color

"We give you the option

with X stations and workstations. Our competitors

have X stations cannot give you that option."

"HP SharedX gives us another fundamental tool in our thrust toward enterprise wide integration" said Mike Fancher. "It is one thing to talk about Concurrent Engineering and quite another to implement it. HP SharedX introduces a new paradigm that puts people in contact with each other without changing the organization" McDonnell Douglas has been an early user of HP SharedX since January.
