## HP Easytime

### A New Approach to System Management

HP Easytime is a friendly software interface to the HP 3000 Multiprogramming Executive (MPE) Operating System. It simplifies user interaction with the system, which makes working with the HP MICRO 3000 extremely easy. Its transparent design is excellent for helping users approach computers for the first time.

#### Key HP Easytime benefits

- No requirement for a full-time system operator
- No dedicated system console; even the console can be used to run applications
- Computer-based training always at hand
- Concise, easy-to-read documentation
- Transparent management of the system
- Consistent, understandable language
- Minimal demand on operator's knowledge of operating system
- Total control of the system
- Available in several languages

### Features

#### Comfortable and easy to use

The software that runs on the HP MICRO 3000 is one of the main features that distinguishes this system from any other. HP Easytime's menu-driven approach to system operation allows daily management of an HP MICRO 3000 with speed, efficiency and accuracy.

When HP Easytime is integrated into applications, it provides a truly customized system environment. The sequence of the HP Easytime screens progresses through the selected functions automatically, identifying all errors and inconsistencies, warning of possible consequences, shielding users from the complex operating environment and from the rising costs of recovering from mistakes.

HP Easytime is the answer to the problems of novice computer users. HP Easytime presents the information logically for immediate action, in several languages: English, German, French, Finnish, Spanish, Norwegian, Danish, Swedish, Dutch, Italian or Japanese.

The expertise of an EDP specialist is not required to run the system. Anyone can comfortably take over the responsibilities and act as a system operator on a part-time basis. The knowledge necessary is so limited that any non-data-processing professional – a financial analyst, secretary, or manufacturing specialist – can handle this responsibility easily.

#### New, more convenient learning methodologies

HP Easytime comes with an on-line computer-based education to help users get started with their HP MICRO 3000 immediately. The modular design of the computer-based training provides the flexibility to cover only the system functions required for daily activities. From now on, new employees will be able to get training on their own, at their own convenience and pace. In these times of limited resources and high personnel turnover, this is a comforting thought.

#### Low maintenance costs

HP Easytime reduces the investment in system training as well as on-going EDP personnel costs. In addition, the system console can be used to run software applications, thus decreasing the initial hardware investment.

#### Enhanced data security

HP Easytime carefully guides the system users through the most complicated activities, preventing erroneous operations and assuring the safety of all business information.

#### HP Easytime functions

HP Easytime guides the HP MICRO 3000 user through the following functions:

- Management of computer messages and requests
- Management of printouts and spooler
- File management
- System backup
- Session/job control
- Disc management
- Cartridge tape formatting
- Review, modification and creation of standard accounts
- Maintenance of operator and system manager passwords
- System configuration review, modification
- Configuration of customer-intallable devices
- System shutdown

## Product Information

---

### Hardware requirements

#### *HP 3000 System*

- HP MICRO 3000 system.

#### *Terminals*

- All HP 2392 A-compatible block-mode terminals capable of logging on to an interactive session on the HP MICRO 3000 may be used.

#### *Printers*

- Any HP MICRO 3000 system printer.
- 

### Software requirements

HP Easytime requires the MPE V Operating System (UB-Delta-3) or later.

---

## Ordering Information

---

### Product

HP Easytime HP 35303 A

The right to use HP Easytime software on the HP MICRO 3000 computer is available according to the terms and conditions of the Hewlett-Packard Software Purchase Agreement.

## Documentation

Reference Manual

35303-90001

---

### Computer-based training

A self-paced training course is integrated into the product. The course includes instructions and labs.

---

### Support

Hewlett-Packard offers a broad range of support services and, with over 180 service and support facilities throughout the world, can meet the special needs that exist in your office. Hewlett-Packard has Support Representatives to provide local expertise and support for these needs.

HP Easytime is available with user interfaces in numerous languages other than English. Contact your Hewlett-Packard sales office for further details.
