## Software/Hardware Guide

### Technical Graphics Solutions

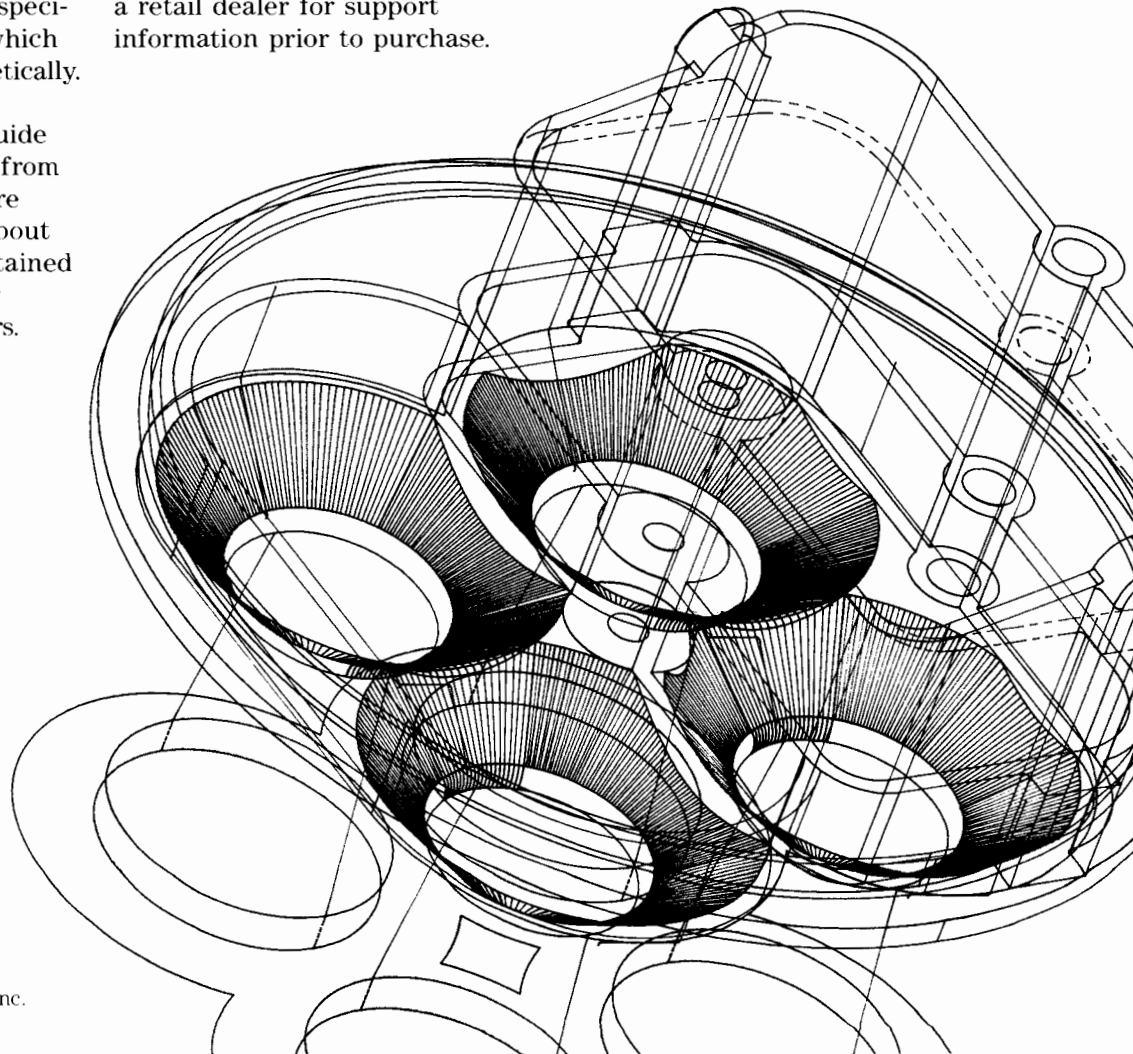

---

In this guide you'll find software and hardware solutions for Hewlett-Packard plotters and a variety of computers. The software packages are divided into three sections: Personal Computers, Workstations, and Large Systems. These sections are divided into specific application areas, in which products are listed alphabetically.

The information in this guide has been provided to HP from the software and hardware suppliers listed. Details about these products can be obtained from computer dealers or directly from the suppliers.

The phone numbers of the suppliers are listed on the back pages of this guide.

This list is current as of the date of publication; however, software support is growing rapidly. Contact the vendor or a retail dealer for support information prior to purchase.
