

HP Intellifont-for-Windows 3.0 lets you create on-the-fly screen fonts and more.

HP's new Intellifont-for-Windows 3.0 gives most Microsoft® Windows applications the same font scaling technology as the HP LaserJet III printer family. *Without* leaving your application, you get type that looks as good on-screen as it does when it comes off your printer. And *without* using valuable memory to store bitmapped screen fonts—so you save hard disk space, too.

Without HP Intellifont-for-Windows 3.0.

After HP Intellifont-for-Windows 3.0 is installed.

What's more, HP Intellifont-for-Windows 3.0 includes eight scalable *screen* typefaces in popular CG Times and Unifers®. And it opens the door to install a variety of other type products from the HP MasterType library—including scalable typeface collections on cartridge or disk and more than twenty individual scalable typefaces.

Please feel free to copy the HP Intellifont-for-Windows 3.0 disks.

- *High-quality* screen fonts—no more jagged edges on displays.
- *On-the-fly* screen fonts and type scaling—get instant screen fonts in the styles and sizes you want from within your Windows application.
- *Matching* screen fonts for HP LaserJet III and IID printer—resident scalable fonts—*What-You-See-Is-What-You-Get* printing.

System Requirements:
HP LaserJet III printer family, IBM PC/AT or compatible with high-density floppy drive, and Windows 3.0 (Windows 3.0 must run in Standard or Enhanced mode—Real mode is not supported).

Before you install HP Intellifont-for-Windows 3.0:

An instruction guide called IFWGUIDE.WRI will be placed in your Windows directory for viewing and printing in Windows Write format.

- Check the HP Intellifont-for-Windows 3.0 disk size. If incorrect, please call 1-303-353-7650 to reorder.
- Make sure Windows 3.0 is installed in Standard or Enhanced mode.

When running Windows 3.0, look for the Intellifont icon in the accessories window to verify installation. If you have additional fonts to install, double click on *Intellifont* and press the *Fonts* button to open the HP Font Installer window.

To install HP Intellifont-for-Windows 3.0:

1. Select the HP LaserJet III or IID printer driver through Windows's *Control Panel/Printer* menu.
2. Exit Windows 3.0 completely and return to a DOS prompt (do not use the DOS icon).
3. Insert Disk 1 in your floppy disk drive.
4. From the DOS prompt of your floppy disk drive, type IFWSETUP and press [ENTER].
Example:
A:>IFWSETUP [ENTER]
5. Follow the instructions that appear on the screens to complete installation.
