## The 3½" Personal Mass Storage Systems

Size alone was enough to convince computer users in the 1970's that 5¼" flexible disc systems were better than 8" systems.

Now HP offers you a 3½" disc system; not only smaller, but more powerful than competitive 5¼" products.

### Packaged to Fit

Occupying only one square foot on your desk, the 9121D dual mass storage system fits snugly with HP's new Personal Computers — including Series 200 Technical Computers, Series 100 Office Computers, and Series 80 Professional Computers.

And the 3½" media is small enough to slip into your shirt pocket!

### Powered to Perform

The 9121D dual system gives you 540K bytes of formatted storage at double the speed of many 5¼" systems.

As your needs grow, try our new 9133A Microfloppy/Winchester combination system; floppy convenience with Winchester performance.

## Protected to Endure

The 3½" media is uniquely packaged in a hard polymer housing with a protective slider over the read/write gap to protect your data from dust and dirt and to reduce damage from frequent handling. A special hard center permits accurate and reliable high density recording.

All flexible discs wear out eventually, so we've added a new system for monitoring media life. Our exclusive new MEDIA MONITOR will track your disc's use and tell you precisely when to replace it — so you don't have to worry about losing data on worn media.

Your HP Dealer or Sales Representative can provide you with specifications and price. Ask about our new 3½" family today.

Specifications	9121D	9133A
Formatted Capacity	540K bytes	4.6M bytes
Sustained Transfer Rate*	17.8Kb/sec	50Kb/sec
Size: Height	3.0 in	5.1 in
Width	12.8 in	16.7 in
Depth	11.2 in	18.7 in

## Meet Our Family

HP has a family of random access mass storage systems that can handle your personal, desktop and micro-computer applications. Choose the drive to match your needs:

The ENTRY LEVEL solution for random access is the new 3½" HP 9121. Offered in a single or dual configuration, this Mass Storage System offers micro-packaging for 270 or 540 Kilobytes of storage and removable media for technical, professional and business applications.

HP 9121S and D

HP 82901M

The HP 82901M Dual Mass Storage System, also with 540 Kilobytes of storage, is your answer for 5¼" compatibility.

DATA EXCHANGE among both HP and non-HP computer systems is possible through the HP 9895A 8" Dual Mass Storage System which can read and write data in IBM 3740 format. The 9895A offers 2.4 Megabytes of removable storage.

HP 9895A

HP 9133A, 9134A and 9135A

ON-LINE, HEAVY DUTY applications are covered by our family of Winchester Systems. They offer 4.6 Megabytes of formatted capacity and high speed I/O to meet the demanding requirements of engineering and business professionals. And Winchester drives are sealed from contamination to satisfy the mass storage needs often found in manufacturing and production environments.

The new HP 9133A and 9135A Winchesters have built-in floppies (3½" and 5¼" respectively) for easy back-up and data exchange.
