

Introducing the HP OmniBook 600CT Notebook PC with a New, Larger Display and Stereo Sound

**For mainstream
performance to go,
take along this feature-
rich featherweight.**

To work on the go, mobile professionals like you tell us they need mainstream performance in a convenient, light-weight package. A tall order? Not for Hewlett-Packard.

In keeping with our reputation for putting big performance into small packages, we've packed even more features into our HP OmniBook 600CT notebook PC. Yet it *still* weighs in at just 3.8 pounds—making it the lightest color desktop-to-go PC on the market. For greater performance and more powerful presentations, we've

added a dazzling 9.5-inch TFT display, a higher-performance graphics processor, and 16-bit Windows™ stereo sound with two speakers and a built-in microphone. And, for work-on-the-go convenience and increased overall system performance, we've switched to a lithium-ion battery that has the battery life you need for the advanced features of the HP OmniBook 600CT.

The HP OmniBook 600CT comes with an Intel486 DX4 75-MHz processor and 8 Mbytes of RAM (expandable to 32 Mbytes). It also offers convenience features such as instant on, a full-size keyboard, a quick-launch software panel, and a familiar, pop-up mouse, plus PCMCIA slots (two type II or one Type III) and plenty of I/O

choices—including an IRDA-compatible infrared port for wireless connections to PCs, palmtops, and peripherals. An optional enhanced port replicator provides additional connections to LANs, SCSI-2 devices, and other peripherals. With all these features and more, the HP OmniBook 600CT notebook PC offers an unbeatable combination of convenience, performance, and portability.

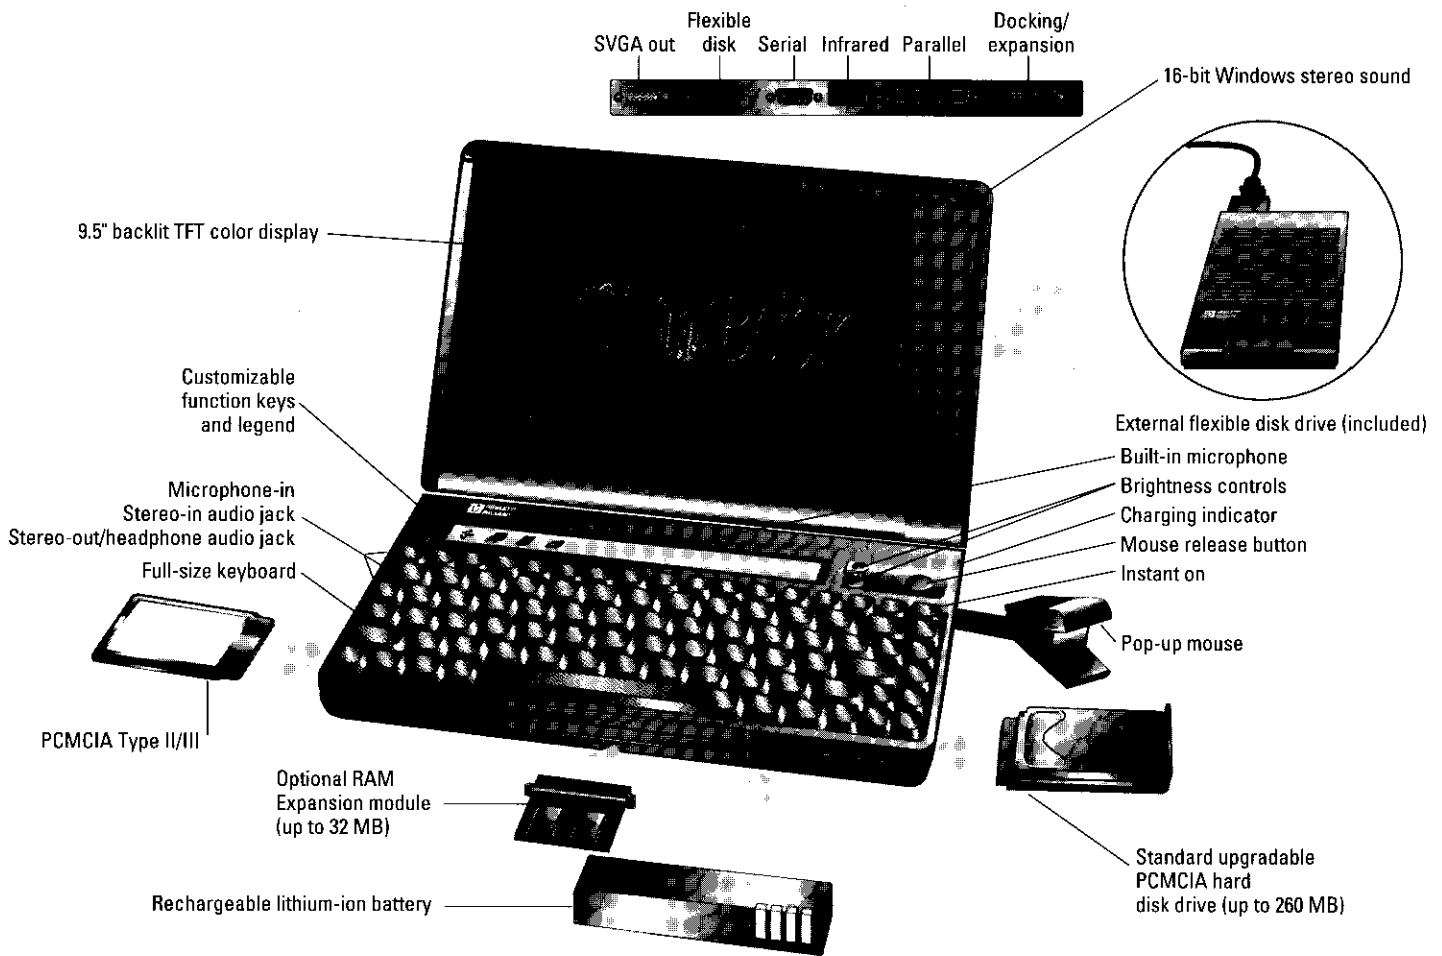

The HP OmniBook 600CT is backed by HP's renowned quality and reliability, a three-year limited warranty and HP's January 1995 rating by *PC Magazine* readers as a leader in notebook service and support. To learn more, contact your HP reseller today.

HP OmniBook 600CT Configuration and Accessories
