
Thanks for stopping by for a demonstration. It's my pleasure to actually show you the quality printing I can provide. My specialty is the production of quality text and overhead transparencies -- in color and black and white.

X,Y, and Z

Notice the vibrant colors, the truly professional line quality and the speed at which I perform. And I'm so quiet, you'll hardly know I'm working.

Want some specifics? My resolution is 180 dots per inch. I can print at 167 characters per second (10 characters per inch). And, I can produce up to 330 different colors!

Now let's have some fun! See me do 10-pitch Courier. Now, I'll do 12-pitch Letter Gothic. I can underline words or **make them bold**. And even compress text or **print color characters** to draw attention to your ideas.

Did I mention that I am multilingual? I am. Some examples: En français, bien sûr. Auf Deutsch, Natürlich! En Español, claro.

In addition to my other talents, I can provide you with professional-quality merged text and graphics -- on paper for reports and on transparency material for those important overhead presentations. I will give you multicolor graphics you'll be proud of -- because quality shows!
