Index to Operating System Manual

HEWLETT PACKARD

HEWLETT-PACKARD COMPANY
Data Systems Division
11000 Wolfe Road
Cupertino, California 95014

MANUAL PART NO. 92084-90001
Printed in U.S.A. December 1981

PRINTING HISTORY

The Printing History below identifies the Edition of this Manual and any Updates that are included. Periodically, Update packages are distributed which contain replacement pages to be merged into the manual, including an updated copy of this Printing History page. Also, the update may contain write-in instructions.

Each reprinting of this manual will incorporate all past Updates, however, no new information will be added. Thus, the reprinted copy will be identical in content to prior printings of the same edition with its user-inserted update information. New editions of this manual will contain new information, as well as all Updates.

To determine what software manual edition and update is compatible with your current software revision code, refer to the appropriate Software Numbering Catalog, Software Product Catalog, or Diagnostic Configurator Manual.

First Edition ..... Dec 1981

Preface

This document provides a cross reference index for the HP 92084A RTE-6/VM Operating System manuals. A documentation map is included to show the manuals needed by the systems users. Typically, these are new users, general system users (programmers, terminal operators, etc.), and the system manager. A quick reference guide is provided in the RTE-6/VM manual set.

Not all manual indices are included in this document. Only those most commonly used and that cross reference is required are provided. The cross reference index is intended to point you to the manual, or manuals, for a particular topic. You may then refer to the table of contents or index of that manual to find the topic of interest. Topics in this document are in the following form:

Topic, <Manual Mnemonic>-<Chapter or Appendix>

Samples: RMPAR, BSP-3, LDR-4, PRM-5, RLIB-4
RN command, TRM-3
:
ROTATE (system macro), MAC-K

The abbreviations for manuals included in the cross reference index are as follows:

BSP	Batch and Spooling Reference Manual (92084-90006)
LDR	Loaders Reference Manual (92084-90008)
MAC	Macro/1000 Reference Manual (92059-90001)
PRM	Programmer's Reference Manual (92084-90006)
ONG	On-Line Generator Reference Manua (92084-90010)
RLIB	Relocatable Library Reference Manual (92084-90013)
SYSM	System Manager's Reference Manual (92084-90009)
TRM	Terminal User's Referenc Manual (92084-90004)
UTIL	Utility Programs Reference Manual (92084-90007)

A brief description of each of the RTE-6/VM manuals (except the driver and language manuals) is included here. This document contains the following sections:

Documentation Map

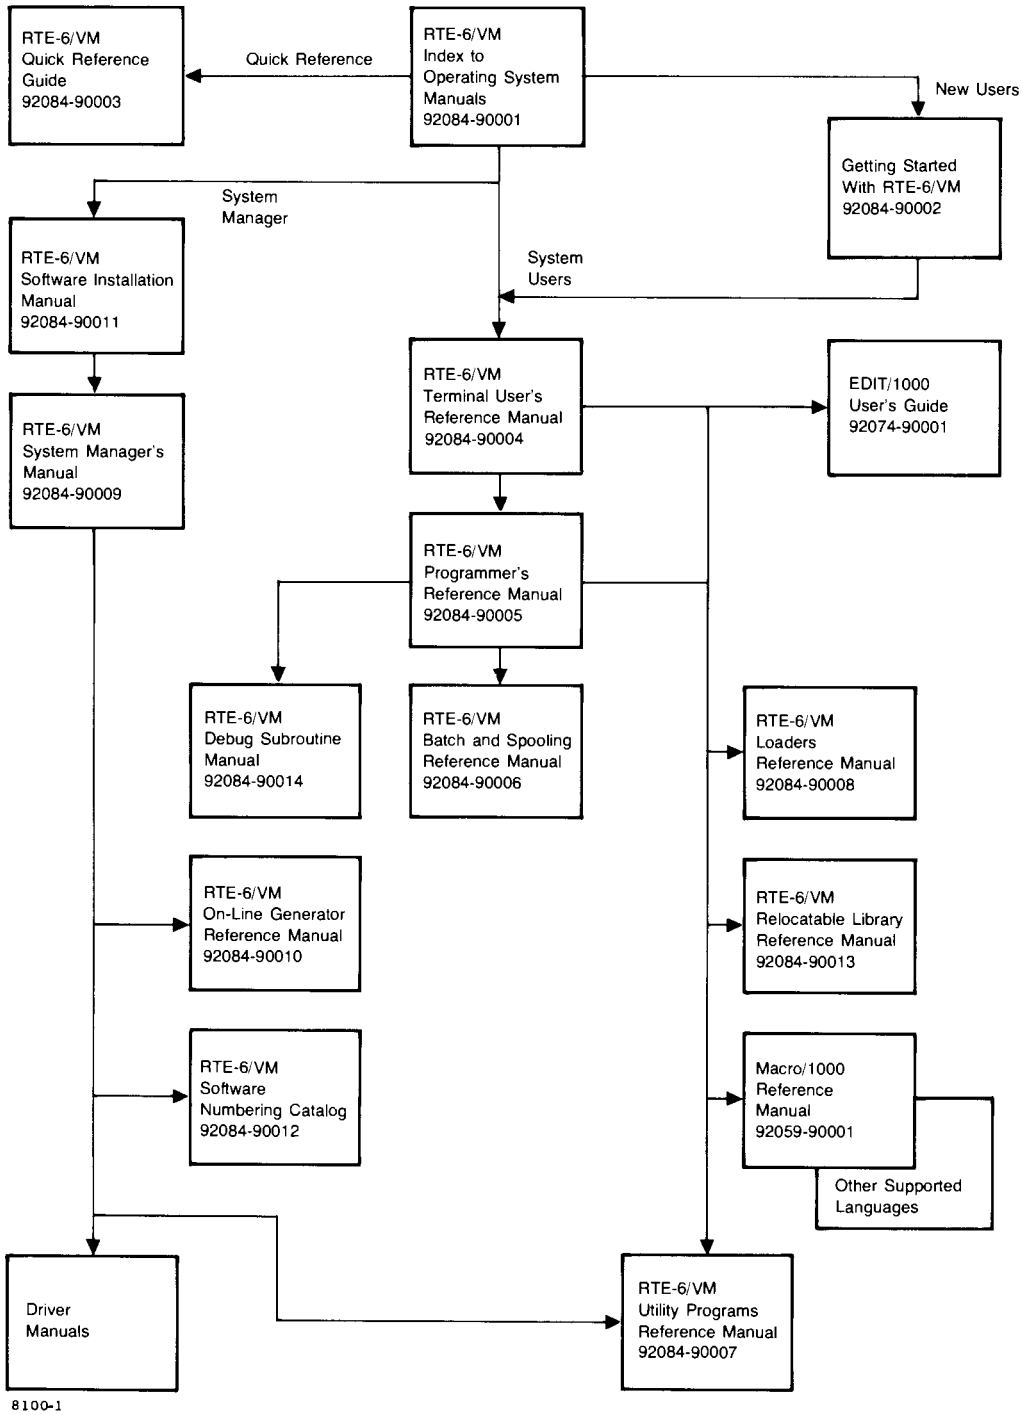
RTE-6/VM Operating System Documentation Map



Manual Description

Getting Started With RTE-6/VM
92084-90002

This manual is an introduction to the RTE-6/VM operating system with Session Monitor. It illustrates the ease with which you can do the following:

* Communicate with the system
* Create and modify files, using the screen Editor
* Develop and run programs
* Execute system commands (or run programs) from a procedure file

This manual should be used as a tutorial guide for the first time user.

RTE-6/VM Terminal User's Reference Manual
92084-90004
Manual MNEMONIC = TRM

This manual describes the scope, format, and utiltiy programs available with the RTE-6/VM operating system. It is intended to be the primary reference source for those performing data entry, file manipulation, program development, and other interactive tasks.

RTE6/VM Programmer's Reference Manual
92084-90005
Manual Mnemonic = PRM

This manual describes the features provided by the RTE-6/VM operating system that allow the user to programmatically use system services and/or control system resources. Detailed descriptions of the calling sequences which invoke system action are included. Examples in FORTRAN-IV and Assembly are also provided.

RTE-6/VM Batch And Spooling Reference Manual
92084-90006
Manual Mnemonic =BSP

This manual describes the uses and requirements of the Batch Spool Monitor subsystem. It is a reference manual for those who wish to use the batch processing and spooling features.

RTE-6/VM Debug Subroutine Manual
92084-90014
Manual Mnemonic = DBG

This manual describes the DBUGR utility program. The DBUGR program is used for debugging programs run on the HP 1000 series computers.

RTE-6/VM Utility Programs Reference Manual
92084-90007
Manual Mnemonic = UTIL

This manual describes the utility programs available as part of the RTE-6/VM operating system. It includes the following utilities:

General System Utilities:	CLOAD	CMD	COMPL	GENIX
	HELP	KEYS	KYDMP	LGTAT
	MERGE	SCOM	WHZAT	
Record Reconfiguration:	OLDRE			
File Copy:	FC			
Cartridge Backup:	READT	WRITT		
On-Line, Off-Line Backup:	PCOPY	PRSTR	PSAVE	
Logical Interchange Format:	LIF			
Disc Formatting:	FORMC	FORMT		
On-Line Driver Replacement:	DRREL	DRRPL		

RTE-6/VM Software Installation Manual
92084-90011

This manual provides the installation procedures for the RTE-6/VM software in the HP 1000 Model 60/65 Computer Systems. It is to be used by the HP Customer Engineer and the System Manager to install the preconfigured primary system.

RTE-6/VM System Manager's Reference Manual
92084-90009
Manual Mnemonic = SYSM

This manual describes the planning, generating, and maintaining of the RTE-6/VM operating system. This manual is to be used in conjunction with the On-Line Generator Reference Manual to provide complete system generation information.

RTE-6/VM On-Line Generator Reference Manual
92084-90010
Manual Mnemonic = ONG

This manual describes in detail the procedures for generating a new RTE-6/VM operating system without shutting down the existing system. Complete exemples of each phase and annotated worksheets are provided. It is intended for use by the System Manager and System Programmers who are involved in the design and maintenance of total system configurations.

RTE-6/VM Loaders Reference Manual
92084-90008
Manual Mnemonic = LDR

This manual describes the MLLDR and LOADR loaders and the program segmentation and loading tools, SGMTR, SXREF, and INDXR. It provides reference material for the experienced user as well as descriptive information about the loading process.

RTE-6/VM Relocatable Library Reference Manual
92084-90013
Manual Mnemonic = RLIB

This manual describes the subroutines contained in the following libraries: $MLIB1, $MLIB2, and $6SYLB.

Macro/1000 Reference Manual
92059-90001
Manual Mnemonic = MAC

This manual describes the Macro/1000 Assembly Language for HP 1000 RTE-basd operating systems.

EDIT/1000 User's Guide
92074-90001

This manual describes the screen editor program EDIT. It provides a functional description of EDIT, in Chapters 1 and 2. Reference information is also included in Chapter 3. Loading information is contained in Appendix A.

RTE-6/VM Quick Reference Guide
92084-90003

This manual provides a quick reference to RTE-6/VM commands, syntax of selected program commands, system tables, and error summary.
