# Printing History

The Printing History below identifies the edition of this manual and any updates that are included. Periodically, update packages are distributed which contain replacement pages to be merged into the manual, including an updated copy of this printing history page. Also, the update may contain write-in instructions.

Each reprinting of this manual will incorporate all past updates; however, no new information will be added. Thus, the reprinted copy will be identical in content to prior printings of the same edition with its user-inserted update information. New editions of this manual will contain new information, as well as all updates.

To determine what manual edition and update is compatible with your current software revision code, refer to the Manual Numbering File or the Computer User's Documentation Index. (The Manual Numbering File is included with your software. It consists of an "M" followed by a five digit product number.)

First Edition	.....	Jan 1985	.....	
Second Edition	.....	Jan 1986	.....	
Third Edition	.....	Oct 1986	.....	
Fourth Edition	.....	Aug 1987	.....	Rev. 5000 (Software Update 5.0)
Fifth Edition	.....	Jan 1989	.....	Rev. 5010 (Software Update 5.1)

# Preface

This manual is a directory of the entry points that exist in software supplied by Hewlett-Packard for RTE-A. The purpose of the directory is to enable users to find the module in which an entry point resides and to minimize naming conflicts between HP software and user code.

---

## Note

You will find four files referenced in this manual that are associated with the RTE-A (92077A) and VC+ (92078A) products but are not shipped with these products. These files are built during the software installation process and are common to most installed systems. Therefore, we are including these references for your convenience.

The files are:

For RTE-A:

\$BIGLB – This file is the \$BIGLB that is built without symbolic links.

\$SBIGLB – This file is the \$BIGLB that is built with symbolic links.

For VC+:

\$BGCDS – This file is the \$BGCDS that is built without symbolic links.

\$SBGCDS – This file is the \$BGCDS that is built with symbolic links.

---

Software subsystems are referred to in the entry point listing by various mnemonics that are defined as follows:

AGP	92862A Advanced Graphics Package
ARPA	98170A ARPA Services/1000
BASIC-C	92857A BASIC/1000C
C	92571A C/1000
Control	91823A Control
Data Link	91732A Data Link
Datapair	92050A Datapair/1000
Datasafe	91745A Datasafe/1000
Datashare	91747A Datashare/1000
Debug	92860A Symbolic Debug/1000
DGL	92861A Device-Independent Graphics Library
DS/1K-IV	91750A DS/1000-IV
DSN/RJE	91781A RJE/1000-II Remote Job Entry
DSN/MRJE	91782A MRJE/1000 Multileaving Remote Job Entry
Forms-A	94250A Forms/1000

Forms-B	94250B Forms/1000-II
FTN7X	92836A FORTRAN 77
Image-I	92069A Image/1000
Image-II	92081A Image/1000-II
NS	91790A NS/1000
Pascal	92833A Pascal/1000
PCIF	94200B Programmable Controller Interface (PCIF) Software
PCIF A-B	94202A PCIF Software
PCIF G-M	94203A PCIF Software
PCIF Smns	94204A PCIF Software
PCIF Telm	94205A PCIF Software
PCIF GE	94206A PCIF Software
PMC	92121A PMC/1000
PMF	91784A PMF/1000
Profile	92083A Profile Monitor
QDM	92131A QDM/1000
RTE-A	92077A RTE-A
VC+	92078A VC+
X.25	91751A X.25/1000 Networking Software
