

The Facts about ThinkJet

- **Print Method**
ink-jet dot-matrix
- **Speed**
150 characters per second (bidirectional, logic seeking)
- **Buffer size**
1 Kbyte
- **Interfaces and power sources**
HP-IB (HP 2225A) AC line power
HP-IL (HP 2225B) DC battery power
Centronics (HP 2225C) AC line power (parallel)
- **Noise**
less than 50 dB (sound pressure)
- **Size**
Width 11.5 in 29.2 cm
Depth 8.1 in 20.6 cm
Height 3.5 in 8.9 cm
Footprint 93.2 sq in 601.5 cm
Weight less than 6.5 lbs 3.7 kg
- **Resolution**
Graphics 96 x 96 dots/inch or 192 x 96 dots/inch
Text 11 x 12 dot character matrix
- **Print pitches** characters/ inch /line
Normal 12.0 80
Expanded 6.0 40
Compressed 21.3 142
Expanded-compressed 10.7 71
- **Print modes**
boldface
underline
- **Character sets**
HP ROMAN8 (supports Danish, Dutch, English, Finnish, French, German, Italian, Norwegian, Portuguese, Spanish, and Swedish)
7ISO character sets (only for HP 2225C)
French Spanish
German United Kingdom
Norwegian/Danish USASCI
Swedish/Finnish
- **Paper feed**
Pin feed for fanfold paper
Friction feed for single sheets
- **Paper size**
8.5 x 11 inches
21.0 x 29.7 cm (size A4)
- **Suggested Retail Price**

A Printer For Your Thoughts

ThinkJet, the Personal Printer
from Hewlett-Packard.
Prints as fast as you think.
Quietly enough to let you think.

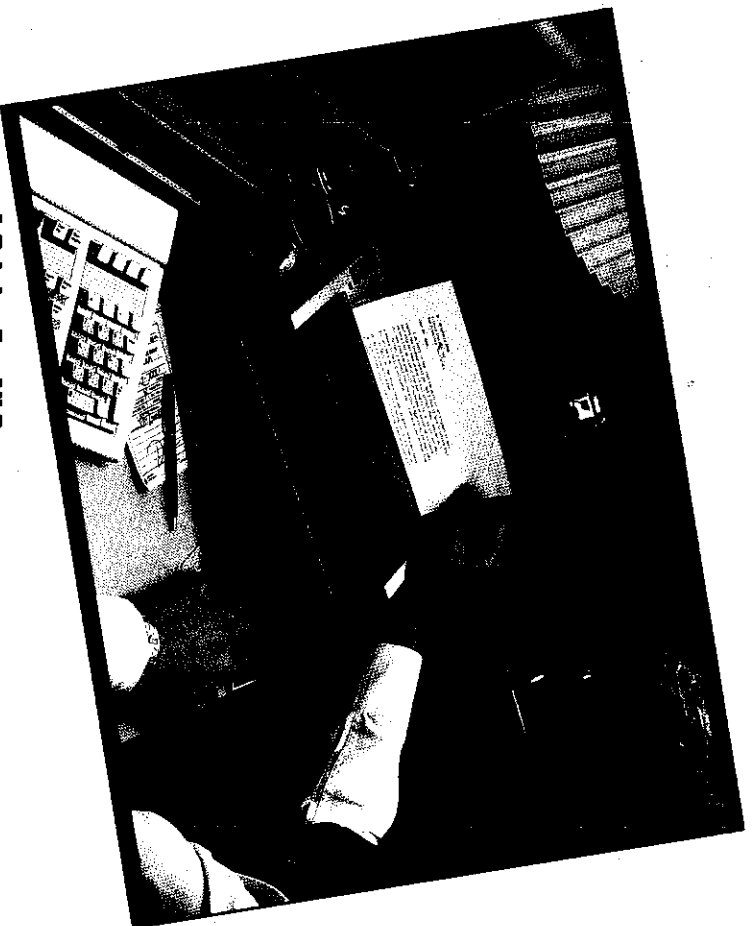

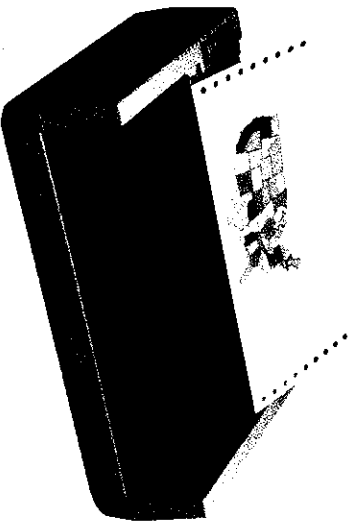

Strong, Silent Type

Great thinkers need a great printer. But powerful printers have always meant a lot of money and lot of noise. Hewlett-Packard offers the alternative, Thinkjet, the personal printer. Quiet, affordable printing in a small, powerful package.

It Whispers While You Work

Ink-jet printers spray ink through the printhead onto the paper. Since the printhead never touches the paper, there is no impact noise and no wear on the head mechanism. With Thinkjet the whole print mechanism is contained in a small, disposable cartridge that simply snaps into place.

But words can't always express all your thoughts. Fortunately, Thinkjet makes graphics a breeze. The printhead literally paints your characters onto the page, so it's like airbrushing your work. A wide variety of character sizes is also available with Thinkjet.

A Printer For All Reasons

Hewlett-Packard has refined ink-jet printing, and now offers it in a lightweight package priced under \$500. Thinkjet, it gets your thoughts down on paper almost as fast as you can think them.

Your Silent Partner

Thinkjet is the perfect companion for your personal computer. You don't have to shout to be heard over Thinkjet, so you can keep it right on your desk. Ideal for home and office because it is so quiet, Thinkjet eliminates the need for cumbersome sound enclosures or remote printing stations. Try Thinkjet and compare it with an impact printer. What you don't hear will make all the difference.

Jet Through Your Copy

Not all printers are created equal. With most, you have to trade speed for text quality. With Thinkjet you can have both. Thinkjet runs at 150 characters per second, more than a page a minute. That means you could print out the Declaration of Independence in under 90 seconds! Print speed isn't even affected by switching to boldface type. It's downright revolutionary.

Ahead of its Time

Hewlett-Packard has combined the ink reservoir with the printhead in an easy-to-replace, inexpensive cartridge. No longer are you faced with the need to replace messy ribbons, or wait while a new printhead is installed. When the unit is out of ink—usually after about 500 pages of type—just snap in another cartridge. You're back in action!

Gets Along with Everyone

Thanks to Centronics parallel, HP-IB, and HP-IL interfaces, Thinkjet is compatible with Hewlett-Packard, IBM, Compaq, TI and Apple personal computers to name but a few. Even HP-41 calculators and HP-71 and HP-75 lap-sized computers can be connected to Thinkjet. Check with your local dealer or Hewlett-Packard sales representative to find out how to connect Thinkjet to your computer.
